POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359
 To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
What feelings did you experience in clinical? Why?	I felt calm for the most part. I felt prepared.
What did you already know and do well as you provided patient care?	I knew how to determine true vs false labor & that helps me provide good patient care
What areas do you need to develop/improve?	I need to remember to provide discharge teaching. I did ok this time but had help to remember that.
What did you learn today?	I learned that sometimes people will need resources when deciding & help finding them. Also that people can be comfortable w/ what they are familiar with.
How will you apply what was learned to improve patient care?	I will do my best to remember that they are has a different life experience & I will be considered more empathetic & try to be forward thinking about resources that pts & family may need.
Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes .	<ol style="list-style-type: none"> 1. I met Clinical judgment by using evidence based practice in determining true vs false labor. I was able to use that knowledge to determine plan of care for the pt. 2. I met professionalism by advocating for a patient during sim to the physician when I felt like the order given was not safe for the patient 3.

Kyasha Miller

IM6 Student Learning Outcomes				
Safety & Quality	✓ Clinical Judgment	Patient Centered Care	✓ Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Clinical Judgment: During sim, I was able to use clinical judgment by using evidence based practice to determine True vs. false labor in my pt. I was able to make the decision of admission and interventions

Patient Centered Care:

Professionalism: During sim I was able to demonstrate professionalism when I advocated for my pt & her baby by telling a physician the orders given were unsafe, & then intervening to do the correct intervention for the pt.

Communication & Collaboration:
