

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Westfall

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I didn't get to participate in anything but I did get to observe several pap smears and breast exams.

2. What was the best/most interesting part of the experience?

The most interesting thing I got to see was a lady who had come in for heavy bleeding and severe pain. During her pap smear the cervix had abnormal growths on it.

3. Is a community nursing position something that you would consider working in? Why or why not?

It was a nice experience but I don't think it would be something I would enjoy doing.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes they did meet the needs of the community. Most were just yearly check ups. But they served women from when they start menstruation until death.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

One patient was in for an antibiotic shot for an infection and was terrified of needles and was refusing. The doctor came in and was explaining to her that if she didn't take the shot it could cause her to go into preterm labor.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism:

Communication & Collaboration: During one pap smear she was having trouble identifying something and called in a colleague to have another look because the cervix was abnormal.
