

Final Clinical Reflection

What feelings did you experience in clinical? Why? I enjoyed the Children's ED. It was a great environment and I felt like I was encouraged to learn in that environment. It was definitely somewhere i could see myself working

What did you already know and do well as you provided patient care? I performed the basic nursing skills related to med admin such as IVP, IM, IVPB. I was also able to start a few IVs and draw blood cultures. I also obtained viral panels and UA regularly

What areas do you need to develop or improve? I think I need to improve on PT teaching. I got better at the end but i still wish i was a little more comfortable with Discharging and med regime teaching.

What did you learn? I learned that teamwork is crucial in the ED. There will be times that you need to rely on someone to help you get something done and it is best for everyone to establish a collaborative environment.

How will you apply what was learned to improve your patient care? By working as a team it is easier to achieve the most positive PT outcomes. It also makes for a positive environment that people want to come to work and do the best that they can.
