### Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Bridget Winn

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed a lot of papsmears and learned a lot of education about birth control options. I saw a nexplanon be placed. We also checked the string of an IUD.

2. What was the best/most interesting part of the experience?

I think the best part was just getting all of the education about these things and what this Nurse practitioner does. I had never seen any of this so it is nice to be educated on everything.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, I like the small staff and all being close to each other, and the hours are great especially when I have my own family.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes. We saw all different ages and I feel like the education was perfect depending on what the pt needed and their age.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Patient teaching was adequate and very thorough. A lot of the teaching was about contraceptive devices. Each pt had their own preference.
