Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Lubbock Health Dep. STD clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I had observed how they would test for STD using a ~~test~~ finger stick, blood draw, and a UA. I observed a pelvic exam and was able to look at in a microscope to see what trich looks like.

2. What was the best/most interesting part of the experience?

The most interesting part was looking in the microscope at what trich ~~was~~ and a regular sample looks like.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes as I am able to help those that may be from a lower income and cant afford to be tested at bigger hospitals.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

They ~~met~~ meet most of the needs the population they serve except testing for UTIs but they test for most STDs. ~~that one~~

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I did witness pt teaching. The pt was concerned that she may have some sort of infection bc she felt itching and burning but wasnt sure what it was. We tested her and everything came back negative and we found out that she may have an allergy to be lube that she was using. We had educated her that itching and burning could occur ~~du~~ during the usage of the lubricant.

Yes the pt was adequate bc they wanted to let pt's know ~~that they have to~~ what could happen if they ~~don't~~ dont keep up ~~o~~ care.

6. Provide examples of care describing one or more of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes

Safety & Quality Clinical Judgment Patient Centered Care Professionalism Communication & Collaboration

Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles. Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders. Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders. Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders. Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

/ Safety & Quality:

/ Clinical Judgment:

/ Patient Centered Care:

Professionalism: I was able to draw blood and did some teaching on getting a urine sample.

/ Communication & Collaboration:
