

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality: I was able to demonstrate safety and quality by staying by my patient’s side during the entire external version procedure. I watched and made sure everything went as planned. As well as going over the consent form she signed and answered any questions she still had before continuing with the procedure. After answering her questions, I called her PCP, and I called a timeout before beginning to ensure my patients’ safety.

Professionalism: I was able to demonstrate professionalism with my patient and her friend at bedside. Throughout the entire SIM, both continuously talked about taking a trip to Hawaii without baby, 2 weeks after her due date. It would’ve been easy to judge them but instead me and Magy provided education and even eased her concerns about a C/S scar.
