Other:									

Patient Report—cont'd

	Labs and diagnostics:	Positive toxicology screen for cocaine
Assessment	Nurse's assessment:	Tyler is irritable and became angry during the admission assessment. He received acetaminophen 1000 mg at 1500 for level of pain 10/10. He is complaining of feeling achy and jittery with pain all over.
Recommendation	Plan of care:	Assess efficacy of acetaminophen in pain management, maintain safety, offer fluids and a snack, minimize external stimuli, obtain complete drug history, and encourage verbalization of feelings.
	Tests/results pending:	Complete blood count
	Orders pending completion:	None
	Other:	The drug history portion of his admission still needs to be completed.
