POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359
To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
What feelings did you experience in clinical? Why?	I felt nervous at first but it went away once I got more comfortable. Labor can be unpredictable, so I wanted to make sure I didn't miss anything.
What did you already know and do well as you provided patient care?	I knew how to check for FHR and to see where baby was positioned. I feel I did well teaching my patient.
What areas do you need to develop/improve?	I feel I could improve on when to call the Dr, and now to give the SBAR.
What did you learn today?	I learned that you can report your patients if you feel its necessary for baby's health.
How will you apply what was learned to improve patient care?	I will speak up if I see something affecting babies health and notify someone.
Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.	<ol style="list-style-type: none">1. I showed patient center care when I made sure she knew when to come back to the hospital.2. Me and my other classmates showed professionalism by respecting the patients choice even though we didn't agree.3. I showed safety & quality by checking moms cervix with a sterile glove.
