Date: 8/26/25

### Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: City of Lubbock Health-Department STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to do the blood draws, HIV stick test, and help label specimens. I also got to observe a head to toe syphilis exam.

2. What was the best/most interesting part of the experience?

I got to see trich under the microscope.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, I liked the atmosphere and the staff was very sweet. It was a nice change of pace from the hospital setting.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, they are very informative with each patient. Whether it be through questions, treatment or just education to keep the patient safe. They are very professional and care for each of their patients.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witnessed patient teaching from each nurse to patient about practicing safe sex and when to get screened. I would like to think it was adequate teaching because of all the information given to them and all of the resources that are on hand.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

**Safety & Quality:**

**Clinical Judgment:**

**Patient Centered Care:**

**Professionalism:** *The nurses ensured that every test result was communicated promptly and appropriately to each patient following the clinic/CDC protocols.*

**Communication & Collaboration:**

OB Community Verification Sheet
