Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?  
I observed hiv testing, throat swabs, blood draws + placing urine samples in test tubes. I was able to participate all in the above except the throat swabs.
2. What was the best/most interesting part of the experience?  
Seeing how the hiv testing kit works.
3. Is a community nursing position something that you would consider working in? Why or why not?  
I would consider doing this as a retirement job because how fast the process is.
4. Do you feel like this community site met the needs of the population they serve? Why or why not?  
Yes, because they offered lots of help and education to anyone who need help. They were also understanding and caring to patients.
5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?  
Patient teaching was taught to everyone especially on what test we were doing and what a positive test looks like. Teaching was very adequate and answered all patient questions/concerns before leaving.

6. Provide examples of care describing one or more of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

**Safety & Quality:**

**Clinical Judgment:** When I was in mom + baby, RN used clinical judgement about our mom not feeling okay mental when she was expressing herself to us while crying about her past trauma that could be affecting how she is right now + her kids. RN contacted psych team + was able to help out our pt + contacted the counsler to help listen to her concerns

**Patient Centered Care:** bc the pt could be going through depression due to what happen in the past with her children + one being in NICU.

**Professionalism:** The nurse was professional about explaining possible pregnancy and what she needed to take if it happened. She was also understanding with the patient needs.

**Communication & Collaboration:**

OB Community Verification Sheet
