Date: 9/2/25

Instructional Module 6
Magnolia Doula Community Clinical Experience

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

***Safety & Quality:**

^{2nd} mom wants a water birth with no medication. The doula informed mom who is close to deliver about what exercises to help with a smoother birth and a video to help mentally prepare her.

***Clinical Judgment:**

Mom's baby was transverse in the belly and mom was not full term having back aches and SOB. The doula tried different positions to help baby move head down and relieve pain for mom.

Professionalism:

Communication & Collaboration:
