9/3/25

## IM6 Student Learning Outcomes

### Safety & Quality

*Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.*

### Clinical Judgment

*Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.*

### Patient Centered Care

*Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.*

### Professionalism

*Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.*

### Communication & Collaboration

*Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.*

**Safety & Quality:**

**Clinical Judgment:**

**Patient Centered Care:**

The nurses continuously checked on mom & reassured her throughout labor. They also involved dad a lot. They asked if he wanted to be closer & if he wanted to cut the cord.

**Professionalism:**

Everything during labor is timed & said out loud. Everyone acknowledges what each other are doing and what needs to be done. Even when stressed/worried the nurses were calm.

**Communication & Collaboration:**
