

<b>IM6 Student Learning Outcomes</b>				
<b>Safety &amp; Quality</b>	<b>Clinical Judgment</b>	<b>Patient Centered Care</b>	<b>Professionalism</b>	<b>Communication &amp; Collaboration</b>
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

**Safety & Quality:**

**Clinical Judgment:**

**Patient Centered Care:**

**Professionalism:**

The nurse and I advocated for the mom to see her twins in the NICU before being transferred to mom/baby unit. She was able to touch them and spend some quality time with them. Even though she wasn't able to provide skin to skin, she was able to find some comfort and reassurance that they were going to be okay.

**Communication & Collaboration:**

I was assigned to put the surgical towels in a bag and I was able to help them count. I was able to be a part of communicating as team.
