

IM6 Student Learning Outcomes

Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

I observed patient centered care when my nurse focused on what the patient wanted or needed and respected it without any judgment. She advocated for her and prioritized her safety. When she was giving the baby a bath, she also tried to include the family in the experience despite only being able to see through the window. She would lift and show the baby to the father who was the one watching her get a bath.

Professionalism:

Communication & Collaboration:
