POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
<p>What feelings did you experience in clinical?</p> <p>Why?</p>	<p>was nervous going into clinical as the "nurse" However the scenarios helped me be more confident and use my critical thinking to figure out what was going on</p>
<p>What did you already know and do well as you provided patient care?</p>	<p>I think collaboration and recognizing patient symptoms and possible causes and risk factors</p>
<p>What areas do you need to develop/improve?</p>	<p>confidence 100%, there were times I should have trusted my gut and assessed/addressed things sooner</p>
<p>What did you learn today?</p>	<p>became more comfortable with manifestations and interventions used in labor and delivery</p>
<p>How will you apply what was learned to improve patient care?</p>	<p>definitely communication technique, meds and IVR comfortability. I got more comfortable reading strips and applying it to patient presentation</p>
<p>Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.</p>	<ol style="list-style-type: none"> 1. ID the patient and making sure interventions are beneficial to the patient even when it is a doctors order. ex: in sim having the Dr want to increase oxytocin from 3 to 4 because he has plans (safety) ↳ advocating for pt 2. during sim in emergent situations such as late decels, birth, tachysystole - ensuring everyone was doing something to help. (calling doctor, IVR, oxygen, NICU) good communication and delegation (communication & collaboration) 3.
