Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Westfall

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? I got to see several pap smears. Westfall showed me how every

woman's cervix is different & one lady didn't have one.

2. What was the best/most interesting part of the experience?

How Westfall approached every woman. The education she gave each woman. Her overall dignity how she treated the women.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, later in my career. I want a lot of hands on before I would get to this point. But yes it would be something I would look @ later in life.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, never judged & offered the help the women came in for. I would go to this place for care.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, diet for PCOS, how to do self breast exam (return demonstration also), contraceptives. It was over the top teaching. Best I have seen.
