Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Parkridge

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I watched an ultrasound being performed. It was really interesting to watch.

2. What was the best/most interesting part of the experience?

I really enjoyed watching the baby move on the monitor. It was really active during the ultrasound and it was interesting seeing the baby's movement even in early pregnancy.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would consider working in a community nursing position later in my life once I have kids but now once I graduate I want to work in the hospital.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes I think that the services they offer such as free ultrasounds and confirmations of pregnancy help patients find OB doctors to go to after.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes the nurse taught one patient about abortion options and another about resources to help with prenatal care. I think in both cases the teaching was adequate because it focused on the patients individual

needs.
