

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

9/24 @ Sim  
**Safety & Quality:** For the safety of mom and baby, hands must be placed on mom, baby, and support person. The nurse should ensure they're worn at all times. In the case of IPV, case managers, social workers, or even security are considered to support mom's safety.  
**Clinical Judgment:**

9/24 @ Sim  
**Patient Centered Care:** My simulation patient had a history w/ preeclampsia, therefore adequate blood flow perfusion is a priority. Interventions placed to promote this was positioning mom on left lateral, admin. oxygen 10L, stop oxytocin, bolus fluids.

**Professionalism:**

**Communication & Collaboration:**
