

“Why Nursing?”

I want to go into the nursing profession so that I may help others in need. I served my nation in the Iraq and Afghanistan wars and wish to continue to serve my nation and my community by being a nurse. I wish to become a behavioral/psychiatric nurse to help those in my community that suffer from mental illness and other diseases. I have worked as an EMT-B, Firefighter and behavioral health technician and thoroughly love and enjoy behavioral health and the opportunities that will arise from this field in nursing.
