Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Parkridge Pregnancy Medical Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I got to see a transabdominal and transvaginal ultrasound done by the nurse. They did a lot of pregnancy tests while I was there.

2. What was the best/most interesting part of the experience?

It was nice to see that previous clients were coming back and my nurse recognizing them, even though the clients didn't. It goes to prove that the services were worth coming back for.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, it was a big difference from the hospital. The pace is more easy-going and relaxed. I think it would be a good option if I ever want to have a change in setting and pace.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, they offer a lot of services that really benefit moms in that early stage of pregnancy before moving forward with an OB and it is all free for them.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

They taught a lot about preparing and setting them up for more care outside of their services. They made sure to go over vitamins and any medications the mom was taking that would possibly be a contraindication with the pregnancy. I think their teaching was adequate because they went over the expectations of the pregnancy depending on how many weeks they were at.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care: *After a positive pregnancy test, I asked the client if she wanted her husband and son present for the results. I brought them in for her emotional support which calmed her anxiety.*

Professionalism:

Communication & Collaboration:
