

Student Name Harlee Richardson

Date: 10/22/25

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD Clinic of Lubbock

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

A few things I got to observe at the clinic today was, drawing blood, HIV & Hep C screens. They also took a lot of urine samples and did a ton of education. They also allowed me to go in the lab and look at all the samples. I got to draw blood & do finger stick for the HIV test.

2. What was the best/most interesting part of the experience?

The most interesting part of today was probably seeing all of the samples they took under a microscope.

3. Is a community nursing position something that you would consider working in? Why or why not?

This is probably not the job I would want in the future mainly bc it got super repetitive & I like jobs that are a little bit more upbeat and where you see different things.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

This does a very good job of meeting the needs. They were telling me that they specifically will go out to high risk communities and test and treat people who wouldn't usually come in for a test. ~~False~~ This is also very good at making these people comfortable & feel welcomed as opposed to going somewhere else.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

The nurses did a lot of patient education on practicing safe sex & how to properly take their medicine. They educated about the different shots they could get to prevent things like HIV & provided everybody with pamphlets and condoms.

OB Community Verification Sheet
