POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
<p>What feelings did you experience in clinical?</p> <p>Why?</p>	<p>I was overwhelmed during my scenario but was thankful to have support to rely on. This was my first experience dealing with a pregnant mom - basically treating 2 patients at one time.</p>
<p>What did you already know and do well as you provided patient care?</p>	<p>We knew our mom was probably going into labor. We knew mom's birth plan and stuck to it as close as we could. We were able to keep her calm and confident. We advocated what was best for our patient concerning her family.</p>
<p>What areas do you need to develop/improve?</p>	<p>I think I need to remember proper steps that the pt is entitled to. Even if I'm flustered or in a rush, I should have still done 7 rights for med admin</p>
<p>What did you learn today?</p>	<p>I learned to go in the room confidently with the knowledge I have. I learned that it's okay to rely on others for help. I have learned that if I go in with a plan I can more or less stay organized</p>
<p>How will you apply what was learned to improve patient care?</p>	<p>I will take the confidence and organization with me for sure. I realized how important and smoother things go when you remain organized and goal oriented.</p>
<p>Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.</p>	<ol style="list-style-type: none"> <u>Communication</u>: I was able to communicate with both <u>collaboration</u> my support team as well as my pt in order to implement a correct/useful plan of care <u>Professionalism</u>: I was able to advocate for my patient's desires when it differed from a family member's opinion. I put my pt first, made her feel heard and more comfortable stating her wants
