

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Bridget Winn FNP, CMC

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? I got to observe the insertion of the nexplanon implant, and watch her educate on her patients follow ups.

2. What was the best/most interesting part of the experience?

The nexplanon insertion

3. Is a community nursing position something that you would consider working in? Why or why not?

It is definitely something I would consider, I loved the environment and the staff were very friendly.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I believe that this community site met the needs of the population because a bunch of woman had questions that a woman (Bridget) was able to relate / or understand.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I did get to witness patient teaching/education. The majority of teachings came from irregular menstrual cycles and I believe adequate information was provided because it consisted of medication/birth control to regulate (medical intervention) or lifestyle changes.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care: I got to hold the teenagers hand during the Nexplanon insertion

Professionalism:

Communication & Collaboration:

OB Community Verification Sheet

Instructional Module: IM 6

Student Name: Alexus Vargas
