Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: CMG - D.W. Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?
I was able to do manual B/P and was able to perform Leopold's maneuvers to assess for the position of the baby. I also was able to use the Doppler fetal monitor to assess baby's heart rate.
2. What was the best/most interesting part of the experience?
I would say the Doppler fetal monitor definitely was the best/scariest part because of how each baby was in a different position and progress of growth.
3. Is a community nursing position something that you would consider working in? Why or why not?
Yes I liked the environment of the office and the work wasn't as strict and uptight as the hospital.
4. Do you feel like this community site met the needs of the population they serve? Why or why not?
Yes I believe the community site was extremely good especially making the moms feel welcomed and understood whether it was someone on insurance or Medicaid.
5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?
The 2 teachings the community handed on for each mother was the plan for birth control after pregnancy, and if they wanted a tubal.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

| IM6 Student Learning Outcomes | | | | |
|---|---|---|---|--|
| Safety & Quality | Clinical Judgment | Patient Centered Care | Professionalism | Communication & Collaboration |
| Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles. | Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders. | Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders. | Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders. | Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders. |

Safety & Quality:

We used safety and quality by informing mom she should have a C-section instead of vaginal birth. The reason being D.w. Blann wasn't comfortable delivering a baby that big.

Clinical Judgment:

Patient Centered Care:

I believe we showed patient centered care by informing mom to get her TDAP vaccine at this appointment just in case trump took medicinal away and she wouldn't have to pay full price.

Professionalism:

Communication & Collaboration:
