

Student Name

Lawson Sullivan

Date:

10/28/15

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site:

STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed how the nurses checked for HIV, Gonorrhea, + Syphilis. I was able to draw blood, collect urine + perform the rapid HIV tests. I also learned about the different lab tests and the importance of the lab staff.

2. What was the best/most interesting part of the experience?

The most interesting part to me is between 2 things. First, I did not realize how rapid the HIV tests were! They also do HIV checks free for the community. The second thing was seeing how trichomonas looks under a microscope!

3. Is a community nursing position something that you would consider working in? Why or why not?

I would! I love volunteering and trying to find ways to give back to my community! One of my goals is to start up a Missionary team to offer free healthcare nationally!

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes I do! They not only provide testing for dimes on the dollar, but they even have medications they give to patients and their partners.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I only saw a couple teachings. Really it was about how long it would take to get results and what each test checks for. I feel like it could have been a little more, just because I think some people don't realize how STD's can be spread.

SLO for STD clinic 10/28/25

Lawson Sullivan

Clinical Judgement: Larissa that works in the lab taught me how to interpret Syphilis tests. She taught me how to interpret RPR's and indicated when TPPA tests are needed.

This falls under Clinical Judgement because as a future RN I will have to help decide and advocate for further testing.
