POST CLINICAL REFLECTION DAY 1

This exercise strengthens your clinical judgment skills.

Reflect on your clinical day and the decisions you made caring for this patient by answering the questions below.

Day 1 Reflection Questions	Student Nurse Reflection
What feelings did you experience in clinical today? Why?	I LOVE WORKING WITH AVERY! She is a great teacher and lets me do a lot of hands on. I am always excited to go see what we have, even if its not much!
What did you already know and do well as you provided patient care today?	I believe I have very strong communication skills. Knowing how to use SBAR, has really made my communication with the providers easy!
What areas do you need to develop or improve?	I really struggle on IV's, when it comes to a blood draw I tend to do good. However, I would like to get way better at my IV's.
What did you learn today?	How to remove an NGT and how to remove wicks from a surgical dressing and how to change the dressing.
How will you apply what was learned to improve your patient care?	I have learned and became better at being able to connect the dots between the labs, diagnoses, and symptoms. I would like to continue to grow my knowledge on everything. I will take every opportunity available! 😊
