**Instructional Module 6: Obstetrics Community Clinical Experience**

Community Site: Dr. Blann's Office

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? Throughout the day I saw mostly vaginal exams, Fetal heart tone assessment and non stress test. The nurse allowed me to assess fetal heart tones & place the Toco for the non-stress test.

2. What was the best/most interesting part of the experience?

The Best/most interesting part was seeing how much the staff ~~felt~~ was knowledgeable not only medically but also personally, they cared for the patient's and helped them feel cared for.

3. Is a community nursing position something that you would consider working in? Why or why not?

I think that I would enjoy I consider working at this community site because I really enjoyed the environment and I think I would benefit from seeing the physician care for the patients. I would prefer to work here after some experience in L&D but I am open ~~for~~ for all possibilities.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I do feel like the community site met the needs of the population because they care for expecting mothers who are getting treatment for whatever needs they need. The care is focused on getting mother and baby ready for a smooth uncomplicated delivery and maintain health for both.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

yes, I got to witness patient teaching with the nurse, the physician was not in the office. With the nurse the main thing taught was birth control for patients who haven't been on birth control but plan to be after delivery. I do feel the patient teaching is adequate, they focused on informing moms with their concerns. I also got to see education on a stress test and what the toco was for.
