

IM6 Student Learning Outcomes

Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism: I demonstrated this outcome by using pacific translators to talk with a mom who only spoke spanish in order discuss how pumping was going. Her baby had been in the NICU for 29 days. mom was pumping 3-8oz every 3 hours. I also spoke with a mom of twins who was developmentally delayed. Professionalism was exhibited by continuing to provide education on how to successfully increase milk supply. We also listened to her concerns regarding caring for babies at home and resources needed without judgment.

Communication & Collaboration:
