

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism:

Communication & Collaboration: When a new patient was admitted to our unit, I collaborated closely with my nurse to ensure a safe and efficient admission process. I communicated my assessment findings, including the patient’s VS, pain level, and initial concerns, while my nurse updated the electronic health record and prepared necessary medications. I also collected VS from my nurse’s other’s 2 patients while she continued admission care to the new patient and I communicated VS and patient findings to my nurse.
