Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Parkridge Pregnancy Center

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to watch an ultrasound and a pregnancy test be performed

2. What was the best/most interesting part of the experience?

I really enjoyed just hearing everything the nurses had to say to the patients during the interview phase of the visit.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes! Especially at a pregnancy clinic, I would consider it in my "later" years of nursing - just so I can practice my clinical skills in my starting years

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes! They are very kind and do not judge these patients. They genuinely just want to help.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I got to listen to the nurse teach about birth control, STI prevention and options regarding pregnancy. The patient teaching was adequate, they always made sure all questions were answered and that there was patient understanding

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Clinical Judgment:

Patient Centered Care: During this clinical, I learned how to demonstrate family centered care by recognizing each childbearing client's unique needs and supporting them with individualized non-judgemental education.

Professionalism:

Communication & Collaboration:
