3. What would the recommended maintenance dosage be for a patient with mild renal impairment?

78mg

9. What is the rationale for a trial of oral paliperidone or oral or injectable risperidone before placing a patient on Invega Sustenna®?

if patients haven't been on it before we need to determine tolerability. w/ daily doses if intolerable we can stop, we cannot stop the med if on an injection monthly

10. Name three practices when preparing an intramuscular injection that ensure aseptic technique is maintained throughout the procedure.

- Wipe w/ alcohol prior to injection
- Wear gloves
- Wash hands prior to + post injection
- Whiteholding syringe
- Alcohol

11. Explain the rationale for obtaining consent for this psychoactive medication prior to preparing the medication for administration.

it is every patient's right unless taken away in a court setting to understand what med they are receiving and the right to refuse it and the right to know the risks
