Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: City of Lubbock Health Department – STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to observe the nurses perform an HIV antibody test and Hepatitis C test for each patient. I was able to draw blood and collect urine samples. I did get to witness one of the nurses performing a vaginal exam on a patient.

2. What was the best/most interesting part of the experience?

I enjoyed learning a bit more about the various STIs and getting to experience how they test for each one. I also enjoyed getting to interact with patients in a community setting.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, I would consider working in a community health setting in my career. I have always enjoyed getting to interact with patients in different settings and I feel that community sites allow for more opportunities for patients to express their feelings about their health. Community sites are typically closer for patients to access and may be viewed as less intimidating than hospital settings.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I feel that the health department is meeting the needs of the public. The nurses are not only testing patients, but educate on the importance of safe sex practices and necessary steps to take if someone ends up being positive for certain STIs.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I had the chance to witness a nurse educating a pregnant about Syphilis and how she will need to receive Bicillin injections once a week for three weeks. She also emphasized that it is important for the patient to avoid having sex until her partner is also tested and treated. I felt that her teaching was good because she explained to the patient the importance of adhering to these instructions to lower the baby's chance of developing congenital syphilis.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

| IM6 Student Learning Outcomes | | | | |
|--|--|--|--|---|
| Safety & Quality | Clinical Judgment | Patient Centered Care | Professionalism | Communication & Collaboration |
| <i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i> | <i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i> | <i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i> | <i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i> | <i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i> |

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism:

I demonstrated professionalism by preparing the exam rooms after each patient and ensuring that they remained stocked with necessary testing supplies.

Communication & Collaboration:

OB Community Verification Sheet

Instructional Module: IM 6

Student Name: _____

Please call the CSON Instructor(s) should you have any additional comments regarding the student's performance and/or participation today.
