POST CLINICAL REFLECTION DAY 1

This exercise strengthens your clinical judgment skills.
Reflect on your clinical day and the decisions you made caring for this patient by answering the questions below.

Day 1 Reflection Questions	Student Nurse Reflection
What feelings did you experience in clinical today? Why?	I feel like I have improved a lot since day 1 in the ICU. I feel more confident with drips and titration.
What did you already know and do well as you provided patient care today?	I do good giving meds. I have gotten better at working with the IV pump.
What areas do you need to develop or improve?	I would like to get better at connecting all the dubs and get better at critical thinking.
What did you learn today?	I was able to hang blood and platelets. One of the shifts I was also able to place a Rhino Rocket for a nose bleed 😊
How will you apply what was learned to improve your patient care?	I love learning from Avery. I want to be just like her. She was able to teach me how to hang platelets 😊
