

Mercy 5
Mrs. Leavell 806-798-8352

Student room: 54392

Mercy 5 is a telemetry unit. We typically have patients with various other disease processes. Please notify the monitor tech if you are removing a pt from telemetry monitoring for any reason.

1. Your clinicals begin at 0630 on Tuesday/Wednesday. If you are going to be absent or are going to be late, you have to text/call me. If you are going to be absent, you will also email Mrs. Payne and let her know. Do not text/call someone in your clinical group for them to relay the message.
2. Never leave the floor unless checking with me first.
3. South 5 obtains scheduled Vital signs at 0800 and 1200. However, many meds require VS before administering it so please do this before medication administration. The floor becomes very busy early in the day, **so it is imperative that you perform a physical assessment on your patient as early as possible.** Do NOT wait until 10 am to do your assessment.
4. **Do not sign in and work on your EHR assignment during your clinical time. You can gather information from EPIC and take notes but do not log into ATI at the hospital.**
5. Always be prepared for your day of clinical!
6. You will be assigned a group of patients with a TPCN each day, listen to report and choose your patient. You decide what patient you are taking and let me know. Take advantage of the knowledge and skills your TPCN has. If you are not busy with your patient, follow them around and help out at every opportunity. DO NOT congregate in break rooms, nursing stations or hallways. (You will get out of clinical what you put into it!) If the call light goes off and you are not busy, you are expected to answer it.
7. You cannot perform a procedure (lab draws, starting IV, dressing changes, Foley, etc.) without your instructor or nurse with you! You cannot give ANY medication without your instructor or nurse with you! **MAKE SURE YOU HAVE WATER AND ANYTHING ELSE YOU NEED BEFORE YOU GO IN TO GIVE MEDICATIONS.**
8. A typical day will have you doing patient care (physical assessment, vital signs, am care/linen change, assist with feeding, etc.) on your patient. If your patient requires a bed bath, please grab a buddy to help you. It is easier to a complete bed bath with a partner. I will tell you when to report to post conference each day.
9. Be sure to follow dress code!!! Be mindful of appearance and attitude! Wear your badge at all times. You will be sent home without it. (Look professional!)
10. Eat something for breakfast. There is a lot of standing and physical activity. You can bring a snack but it must be eaten in the breakroom.
11. Always bring your stethoscope, penlight, watch, pen, sharpie, bandage scissors, badge, and packet.

Please **MAKE SURE**:

You have put V/S in the chart by 0800

- You have finished all the necessary treatments;
- That your patient's assessment and bath is completed before lunch.

- You have completed and totaled your I & Os;
- Be sure & complete the hourly rounding in the chart
- Your patient's room is neat; trash isn't overflowing (if it is-- empty it please);
- They have fresh water (if allowed);
- And you have offered AM care (oral care, toileting, hands, and face washed, back rub, linens straightened and tucked).
- You have reported off to the nurse before leaving the floor.

Meet Mrs. Leavell by Starbucks on the first Tuesday then the rest of clicinical days we will meet in the student/conference room on Mercy 5. The student room is located down the hall from the main nursing station. If you get lost or have questions. Please call or text me.

Cathy Thomas, RN, DNP

806-319-1570

For the First Week of clinicals ONLY look up these additional 5:

Medication sheets are due at 6:30 on the first day of clinical.

1. ***Vancomycin***
