IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism:

L&D
• explained to the patient promptly that the doctor is coming soon to AROM and place an IUPC. my nurse ~~thoroughly~~ thoroughly explained both procedures and the possibility of a fetal scalp electrode (she explained what it was and that we would only do it in an emergent case.)

Communication & Collaboration:

mm/baby
-# mother chose not to breastfeed, so we educated her on suppression of breastmilk. told her about the use of ice packs, cabbage leaves, tighter bras, and to not allow the HOT shower water to hit her directly.
