

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

L&D/NURSERY I DEMONSTRATED PATIENT CENTERED CARE BY PERFORMING FUNDAL RUBS INITIALLY IN THE OR TO ENSURE THE UTERUS WAS PROPERLY CONTRACTING & FIRM. BY PERFORMING THESE FUNDAL RUBS EVERY 15 MINUTES, IT PREVENTS/AIDS IN PREVENTING HEMORRHAGING DUE TO BLOOD & FLUID LOSS FROM SURGERY.

Professionalism:

Communication & Collaboration:

L&D/NURSERY I WAS ABLE TO USE PROPER COMMUNICATION & COLLABORATION BY LISTENING TO MY NURSE WHEN INSERTING A CATHETER, PRIOR TO SURGERY. I ALSO COLLABORATED WITH THE SCRUB TECH BY ASSISTING IN THE INSTRUMENT COUNT IN THE OR. BY USING THESE SKILLS, IT RESULTED IN A SAFE SURGERY FOR THE PATIENT AND AIDED IN A PROPER RECOVERY BY NOT HAVING TO RETURN FOR AN UNNECESSARY SURGERY TO REMOVE A RAG OR INSTRUMENT FROM SURGERY.
