

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

STD CLINIC 2/17

BECAUSE OF THE SEVERITY OF THE DISEASES OR INFECTIONS COMING INTO THE STD CLINIC, IT WAS VERY IMPORTANT TO USE PROPER PPE (GLOVES) WHILE HANDLING THESE PATIENTS BLOOD, & WHILE DOING PHYSICAL EXAMS. BECAUSE OF THESE SAFETY PRECAUTIONS, IT HELPS PREVENT HARM TO US OR POTENTIALLY SPREADING IT TO OTHER PATIENTS.

Clinical Judgment:

SIM 2/24

I DEMONSTRATED CLINICAL JUDGEMENT WHEN MY PATIENT'S TEMPERATURE STARTED TO DROP, CAUSING HER O2 TO ALSO DECREASE. BY WARMING HER UP USING SKIN TO SKIN, BLANKETS, & A PATIENT WARMER, I WAS ABLE TO INCREASE HER TEMP, & BY USING 2L OF BLOW BY OXYGEN, I INCREASED HER O2 SAT WHICH ALL PREVENTED RESPIRATORY DISTRESS.

Patient Centered Care:

L&D/NURSERY

I DEMONSTRATED PATIENT CENTERED CARE BY PERFORMING FUNDAL RUBS INITIALLY IN THE OR TO ENSURE THE UTERUS WAS PROPERLY CONTRACTING & FIRM. BY PERFORMING THESE FUNDAL RUBS EVERY 15 MINUTES, IT PREVENTS/AIDS IN PREVENTING HEMORRHAGING DUE TO BLOOD & FLUID LOSS FROM SURGERY.

Professionalism:

STD CLINIC 2/17

WHILE AT THE STD CLINIC, A MAN CAME IN WITH SYMPTOMS OF AN STI. AFTER DRAWING HIS BLOOD, WE LEARNED THAT HE HAD CONTRACTED SYPHILIS. HE WAS VERY EMBARRASSED & NERVOUS BECAUSE HE HAS NEVER HAD AN STD BEFORE, BUT WE KEPT REASSURING HIM THAT IT WAS NOTHING TO BE EMBARRASSED ABOUT & THAT IT WAS GOOD THAT HE WAS SEEKING TREATMENT.

Communication & Collaboration:

L&D/NURSERY

I WAS ABLE TO USE PROPER COMMUNICATION & COLLABORATION BY LISTENING TO MY NURSE WHEN INSERTING A CATHETER, PRIOR TO SURGERY. I ALSO COLLABORATED WITH THE SCRUB TECH BY ASSISTING IN THE INSTRUMENT COUNT IN THE OR. BY USING THESE SKILLS, IT RESULTED IN A SAFE SURGERY FOR THE PATIENT AND AIDED IN A PROPER RECOVERY BY NOT HAVING TO RETURN FOR AN UNNECESSARY SURGERY TO REMOVE A RAG OR INSTRUMENT FROM SURGERY.
