I want to be a nurse so I can help people when they need it most and provide the best care that I can. Growing up I have always loved helping others and that has impacted me in choosing to go into nursing. I want to provide every patient with compassion, empathy, kindness, and care that only a nurse can provide. My mom is a pediatric hospice nurse and she has always inspired me to become a nurse, and I want to take care of people like she does. I want to share all the love and compassion that I can and nursing will help me do that for other people.
