Focus more on Categories instead of particular medications there are a ton of them. ATI had sheet for a lot of these Medications. That I emailed out.

COPD

Bronchodilators- beta2 adrenergic agonists

Short acting- Albuterol, Ventolin

 Long acting Salmeterol (serevent)

Oral-

Terbutaline (brethine)

Anti-Inflammatory

Inhaled Glucocorticoids

 Pulmicort- Generic Name: budesonide inhalation

Flucticasone propionate (flovent HFA)

Triamcinolone acetonide (Azmacort)

Glucocorticoid/ beta2 agonist

Advair- generic Name: Fluticasone/salmeterol

Oral Glucocorticoids
Prednisone

Mast Cell Stabilizers
 Cromolyn (intal)

Leukotriene Modifiers
Montelukast (singulair)

Methlxanthines-
Theophylline

Anticholinergic
Ipratropium (atrovent)

TB Medications
Isoniazid/INH
Rifampin
Ethambutol
Pyrazinamide
BCG Vaccine
Pneumonia antibiotics

Quinolones-
Ciprofloxacin (cipro)
Levofloxacin (Levaquin)

<u>Penicillin</u>
Amoxicillin
Piperacillin

<u>Cephalosporin's</u>
Cefazolin
Cephalexin
Cefotetan

<u>Carbapenems</u>
Meropenem

<u>Macrolides</u>
Erythromycin
Azithromycin

<u>Pneumonia vaccine</u>

<u>Decongestants</u>
Phenylephrine
Pseudoephedrine

<u>Topical</u> – ephedrine

<u>Antitussive</u>

Opioid-codeine

Non opioid- dextromethorphan

<u>Expectorants</u>

Guaifenesin (mucinex)
