Harmonizer

The natural personality profile for you is indicated by the solid line on the graph below. Note also the dotted line; it represents the Blended Profile that most nearly matches your graph. Seventeen Blended Profiles are used as the baseline for interpreting the combinations of four basic dimensions of personality. The information in this section is derived from the Harmonizer Blended Profile. Typically, the more closely the solid line graph matches this Blended Profile, the more accurately the information will describe your natural behavior style.
