

**Discovering Your  
Extraordinary Self!**

# Detailed Report

**Carl von Reiche**

**vickyvonreiche@gmail.com**

**Date of Birth:** Tuesday, October 27, 2009

**Completed:** Thursday, June 19, 2025

**Consultant:** Gert de Bruin

**Email:** thebusisafamily@gmail.com

THE PURPOSE OF THIS INSTRUMENT IS SELF-DISCOVERY. IT IS DESIGNED TO HELP PEOPLE IDENTIFY THEIR NATURAL PERSONALITY STRENGTHS, AND THEIR POTENTIAL VOCATIONAL INTERESTS, SKILLS/ABILITIES, AND PRIORITIES. THE YES! SURVEY SHOULD NOT BE USED TO IDENTIFY, DIAGNOSE, OR TREAT PSYCHOLOGICAL, MENTAL HEALTH, AND/OR MEDICAL PROBLEMS. THE USER ASSUMES SOLE RESPONSIBILITY FOR ANY ACTIONS OR DECISIONS THAT ARE MADE AS A RESULT OF USING THIS AID FOR SELF-DISCOVERY. BY USING THE YES! ONLINE ASSESSMENT, YOU EXPRESSLY WAIVE AND RELINQUISH ANY AND ALL CLAIMS OF ANY NATURE AGAINST CROWN FINANCIAL MINISTRIES, ANY AFFILIATED COMPANIES OR SCHOOLS, AND/OR THEIR EMPLOYEES AND/OR THEIR CONSULTANTS ARISING OUT OF OR IN CONNECTION WITH THE USE OF THIS ASSESSMENT.

Yes! will help you discover more about yourself. You can use this information for making decisions about (1) your education; (2) your activities: school, church, sports, or community; (3) your relationships; (4) your work; and, finally, (5) your career.

## Part 1: Personality

Concept of Personality

Six Traits of Personality

Your Personality Trait and Subtraits

## Part 2: Interests

Concept of Interests

Six General Interest Areas

## Part 3: Skills and Abilities

Concept of Skills and Abilities

Skills and Abilities: Top Areas

## Part 4: Priorities

Concept of Priorities

Priorities: Surroundings (living/work environment)

Priorities: Results (outcomes of life/work)

Priorities: Life Purpose (the "why" of life/work)

Understanding Personality helps you know more about yourself - and others!

Personality reflects the way a person is naturally motivated to act. There are so many different personality traits in gazillions of combinations. They're as different as noses and ears. All personality traits are gifts, equal and valuable. No traits are right or wrong, or any better or worse than the others.

Learning to identify and appreciate each person's special combination of personality traits is enlightening. Understanding how these work together to make each person unique helps you embrace and appreciate these differences. You can understand yourself - and others - at a deeper level, which is a big help in building relationships. We could all use a little more of that!

Appreciate your unique design! Comparing yourself to others or trying to be someone you are not can result in unnecessary problems. Take advantage of your personality strengths. Be aware of potential struggles too.

In the Personality section of this report, you'll learn what a special individual you are, created with differences that make you, YOU!

**Be unique and memorable, confident and proud. Be Your Extraordinary Self!**

Carl, this survey covers six major trait pairs, measured and displayed in graphs. Each trait is associated with a range of behaviors, strengths, and potential struggles. Remember, when it comes to personality, it is not better to be one way or the other. What is important is that you understand - and embrace - your unique personality.

This section of your report comes from your assessment responses. It reflects profiles typical of people who scored like you. Confirm or challenge the information based on your knowledge of yourself. Have someone who knows you well weigh in on the conversation too. Concentrate on the portions that describe you well.

## Confirm Your Personality Feedback

The following pages review your six personality traits, listed in order from most extreme to least extreme.

Before flipping to your scores, use the list below to review the personality trait pairs. How well do you know yourself? Take a guess! Use the ovals right next to the pictures and fill in the oval on the side you think you lean toward. If you think you can easily go either way at times, put an X in the middle of the center arrow to note this. You can have someone who knows you well also share their guesses using the outer ovals (or a different symbol in the middle of the center arrow if they think you can go either way).

<input type="radio"/>	<input type="radio"/>		<b>Unstructured</b>		<b>Conscientious</b>		<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>		<b>Careful</b>		<b>Adventurous</b>		<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>		<b>Factual</b>		<b>Compassionate</b>		<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>		<b>Cooperative</b>		<b>Authoritative</b>		<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>		<b>Reserved</b>		<b>Outgoing</b>		<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>		<b>Traditional</b>	<input checked="" type="radio"/> 	<b>Creative</b>		<input type="radio"/>	<input type="radio"/>

# 1 Your CREATIVE Personality Trait and Subtraits

Your score shows that you are super creative. You are clever and quick minded, great at coming up with new ideas and answers to problems, even odd or unusual ones. You like to daydream or think about things from different angles, sometimes just for the fun of it. You may express your creativity in a bunch of different ways, including problem solving, working with your hands, or being artistically creative (i.e., in writing, music, drama, or visual

arts.)Every upside can have a downside if you overdo it. If you don't consider the practical steps needed to make your ideas work, you can create problems that aren't fun to solve. Lack of focus may make you a great starter, but not a great finisher. You may forget important practical matters. To be more effective, don't hesitate to use lists, set (and keep) deadlines, and have someone check in on your progress.

## 2 Your FACTUAL Personality Trait and Subtraits

Your score shows that you call things as you see them. You are task-focused and like to keep things moving.

You work well in all kinds of settings. You are not easily bothered if others around you are unkind or unsupportive; you don't take it personally and let it ruin your day. You're hard to scare off, even if there is rejection or conflict. Because of this, you might enjoy work or activities related to sales, management, politics, or law.

Keep in mind that every upside can have a downside. You may accidentally hurt someone's feelings without being aware of it. Or you may overlook others' needs and seem harsh or uncaring. Naturally strong-willed, you might come across as wanting to have things your way. Try to be more kind, patient, and understanding to soften any rough edges. This will help you be more effective in dealing with others.

# 3 Your RESERVED Personality Trait and Subtraits

Your score shows that you tend to be a reserved person, preferring to spend with a few close friends or familiar people. In group situations, you want to be quietly supportive and helpful. You probably prefer to work with your hands, information, or ideas, rather than people. You're great at being task-oriented, focused, and at using your time well. You see situations as they are and don't get carried away with gossip or caught up in relationship drama. You are a careful listener - and a careful

responder - and may enjoy people watching more than socializing. When you speak, people listen, because you give practical responses and what you say matters. Keep in mind that a strength overdone can become a weakness. If you don't share your good ideas, others miss out. And a lot of life requires working as a team, so it's important to be able to relate to people and communicate well. Don't be afraid to stretch yourself in this area.

# 4 Your AUTHORITATIVE Personality Trait and Subtraits

Your score shows that you naturally like to be in control in most any setting and may push for independence. A natural, confident leader, you trust yourself and want to be in charge. Your desire to influence and persuade may be evident in several areas of life. You might avoid situations where you consistently have to be a follower. You tend to see the "big picture", which helps you see things differently, leading to new and exciting ideas that

you want to see through. You don't hold back expressing your ideas and opinions. There are two sides to every coin. Because of how much you like to be in charge, you might take the lead when you don't have the necessary experience or facts. You might overlook what is needed to make your big-picture ideas become a reality. Practice some caution and listen to good advice from others who have a different perspective.

# 5 Your CAREFUL Personality Trait and Subtraits

Your score shows that you prefer to be involved in things that are steady and low-risk and you like to be conservative and careful. You're great at focusing on one thing at a time, carrying out tried-and-true plans and processes, and finishing tasks. You are most comfortable around people and activities that are familiar and work well in a team. You will let go of some of your personal desires to help. People respect your servant's heart.

Remember that there are two sides to every coin. You're naturally cautious, but don't overdo it. Opportunities might disappear while you overthink things or try to get rid of all the uncertainties. Taking thoughtful risks, and even experiencing failures, can stretch you toward success. Try taking small chances in low-risk situations to build confidence for later on when there might be more at stake.

# 6 Your UNSTRUCTURED/CONSCIENTIOUS Personality Trait and Subtraits

Your score shows that you have the ability to be both exact and untroubled by details. In some areas, you may be structured, organized and thorough, having things "just so." You may even be a bit stubborn at times, not wanting to compromise your stand. In other areas, however, you may be happy-go-lucky and unconcerned about planning and the nitty gritty of details. You may want to go in a different direction from the norm, willing to bend

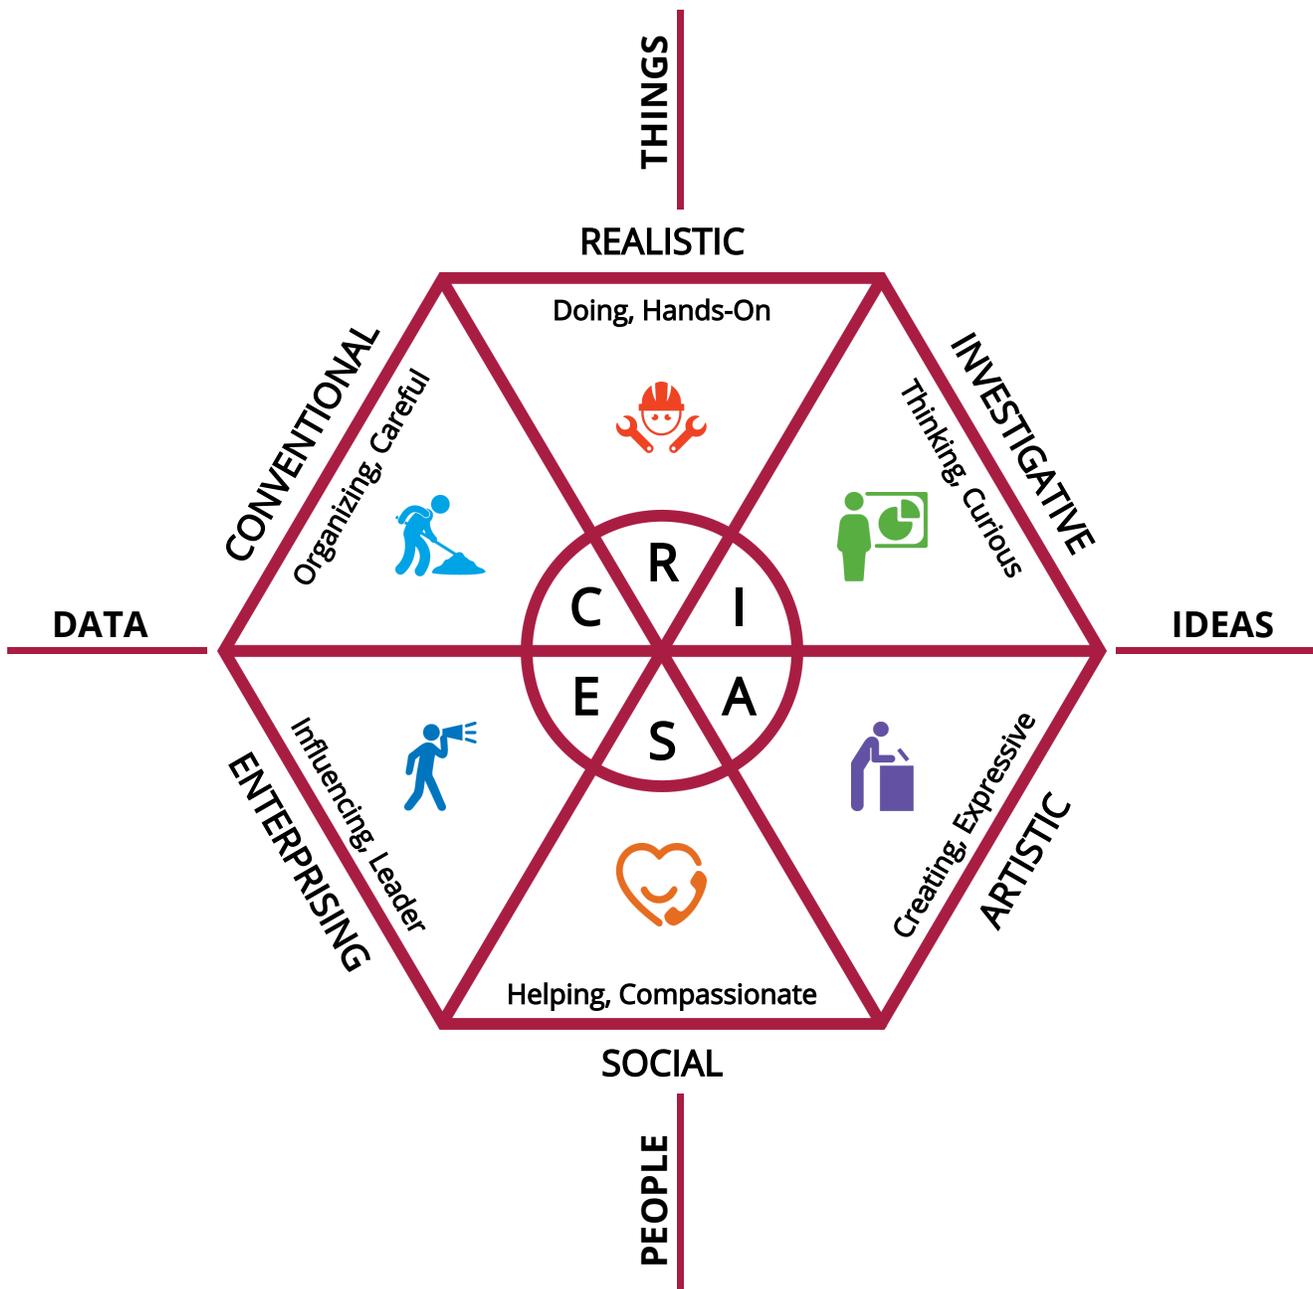

or overlook certain rules or procedures. Your balance in this trait lets you be spontaneous and carefree in some situations, and more guarded and careful in others. The reason is simple: In your view, some things need more attention and care than others. Writing out goals and developing a well-thought-out plan will help you make the most of this flexibility, with interesting and amazing results.

In everyday life you'll find that you'll get to do things you like and things you don't like. This section highlights some of the activities, occupations and subjects which interest you most. It may reveal particular areas in which you may want to focus. Let's go exploring!

Study the diagram below to help you understand the six General Interest Areas of the Holland code. Then turn the page to see your personal results.

## Six General Interest Areas

Carl, discovering your general interests is super important. People tend to excel when they are interested in what they do! Different people are interested in different things. When you can be involved in areas that interest you, it adds fun to the mix, even with difficult or otherwise boring tasks.

The more you can participate in areas that excite you due to a high interest level, the more likely you are to be happy -- which lowers your stress too. There are several ways to categorize career interest.

There are 6 main General Interest Areas. 31,000+ occupations can all be divided into these six areas. WOW!

Below, the graph to the left and the list to the right help you see where your interests fall within the six General Interest Areas. Keeping these in mind can help you make the best decisions for the highest level of joy and satisfaction in what you do.

-  Creating (Artistic) (28%)
-  Thinking (Investigative) (21%)
-  Helping (Social) (19%)
-  Influencing (Enterprising) (13%)
-  Doing (Realistic) (11%)
-  Organizing (Conventional) (8%)

Note: These result numbers were rounded.

# Combined Interest Scores

The following tables below show your highest scores on the Activities, Occupations, and Subjects groups. They do not take into account your experiences or skills -- only your interests. You may begin to see some themes as you review these three tables.

### Subject Groups

Carl, understanding your skills will be important as you decide where to invest your time and energy—and eventually, your career choice. Doing something that comes naturally invites joy!

Match these skills/abilities to activities that best use them to maximize your potential. First of all, you'll start at a higher baseline, learn faster, and achieve more than if you didn't have a natural skill in that area. For example, some people could study music and practice singing for years. If they lack the natural skills to excel, they'll never find real satisfaction, success, and joy trying to be a professional singer.

Second, working in your natural strengths is just more fun. People experience less stress using skills in which they naturally excel. Usually these have been recognized, valued, and rewarded by others. Confidence grows as you use your natural skills/abilities, leading to even more success and joy.

The bottom line? You are most likely to excel and find joy when you use your natural skills/abilities. Be mindful of your lower skill/abilities areas while understanding that making them a primary focus is generally unproductive. In this area, try to swim with the current, not against it.

Note: This section's skills/abilities scores are self-assessed, not from an achievement or aptitude test. Research indicates that self-assessment can give an accurate overview of a person's skills.

## Develop Your Skills and Abilities

Even natural skills require training, education, hard work, and dedication to maintain and further develop them. Most successful people work diligently to use and improve their natural strengths. A professional golfer hits hundreds of balls every day and a concert pianist spends hours practicing in order to fully develop their natural athletic and musical abilities.

Study your highest-ranked skills. Analyze any relationship among them. Is there overlap? A common theme? Do any relate more to areas that you would use just for fun rather than as a basis for something greater? Are there ways that hobby skills could transfer to your other responsibilities?

People high in this skill group typically like to clearly communicate their thoughts and ideas through writing or speaking. They have the ability to synthesize information and present key points logically and concisely in reports, letters, summaries or presentations. They may enjoy putting their thoughts down on paper, creating original stories, novels, or poems, and/or socializing and working with others. They will do well in careers which enable them to communicate in their preferred style and area of interest.

People high in this skill group typically have a high level of hand-eye coordination, strength, speed, power, mental resilience, aerobic and anaerobic capacity, balance, coordination, agility, stability, and flexibility in motion, along with a deep desire to compete. They also pursue discipline, training, healthy dietary habits, rigorous exercise, and adherence to athletic ideals. Training in the medical sciences may be needed to acquire further knowledge of the human body, muscle groups, and rehabilitation procedures.

People who score high in this category are good with intellectual challenges and enjoy problem solving. They are comfortable with activities such as researching, analyzing facts and figures, and solving abstract problems. They tend to use logical thinking and objective reasoning, and they enjoy working with data and ideas and using critical thinking skills to analyze problems and evaluate solutions. They often generate new ideas or approaches to problems. These skills are useful in science, business, and research, as well as many other occupational fields.

4. Math

38

0

50

100

Moderately Low (38)

People who score high in this category are comfortable working with numbers and data. They are detail-oriented and motivated to be accurate and precise in gathering, recording, and analyzing data. They are precise in calculations and thrive on opportunities to work with information that can be measured, validated, or explained by numerical data. Mathematical skills can be utilized in many different fields including accounting, engineering, economics, and computer science.

Understanding your Priorities can open your eyes to the importance of really knowing what's most important to you. If you have your priorities down, everything else seems to fall into place.

Priorities will direct you to classes you take, activities to participate in, and even to your future career decisions. They affect your whole life! You might think that's a no-brainer. But a lot of folks get hung up in doing stuff that is low on their own priority list. It steals their time. It steals their productivity. It can even steal their joy.

Understanding and using these priorities will bring meaning and purpose to what you do in your classes, your extra-curricular activities, and even the selection of your future career. The more your priorities line up with your reality, the better you will do and the more content you will be!

Carl, you can be involved in something that is a good match for your interests, skills/abilities, and personality strengths. However, you can still experience dissatisfaction and stress if it does not match your priorities. For example, many people value working outdoors and will never feel totally comfortable if they are stuck inside. Others may need to know that they are helping people directly and will not be satisfied working alone or with machines.

Some people only look for success in the material sense thinking it will be satisfying as well. All too often, they end up unfulfilled and burned out. Using priorities in making important decisions helps one avoid such disappointment and stress. Review your priorities to see if you are being consistent. Compare them to the way you are actually operating. This three-part section on priorities can help to guide your life and work.

Expect your priorities to change; these are yours and you can modify them whenever you want. Often they shift with age, experience, and changing family situations. Save this report for future reference. A periodic review of your priorities will enable you to see how well you are sticking to them and if adjusting any of them makes sense.

Listed from the most important to the least, these items show what you want in your surroundings or environment.

If you have the higher priority items in the settings in which you find yourself, you will be more satisfied.

These are the results you really want and expect from the activities and jobs you do.

Remember, none of these priorities are bad in and of themselves. The ones you choose represent what's important to YOU!

Why you do what you do is important and can help you determine your Life Purpose.

Experience shows that people who thoughtfully decide on a life purpose and then make career choices that contribute to that goal have a unique peace and sense of fulfillment.
