Advanced Medical Surgical Nursing- 2022**

**Firelands Regional Medical Center School of Nursing
Sandusky, Ohio**

Student:
Semester:

Final Grade: Satisfactory/Unsatisfactory

Date of Completion:

Faculty: Frances Brennan, MSN, RN; Amy M. Rockwell, MSN, RN
Chandra Barnes, BSN, RN; Brian Seitz, MSN, RN
Brittany Lombardi, MSN, RN

Faculty eSignature:

DIRECTIONS FOR USE:

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S)**, **Needs Improvement (NI)**, **Unsatisfactory (U)**, and **Not Available (NA)**. The faculty member will initial if in agreement with the student’s evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written in the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a “S, NI, U, or NA”. If the student does not self-rate, then it is an automatic “U”. A student who submits the clinical evaluation tool late will be rated as “U” in the appropriate competency(s) for that clinical week. Whenever a student receives a “U” in a competency, it must be addressed with a comment as to why it is no longer a “U” the following week. If the student does not state why the “U” is corrected, it will be another “U” until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. If the final performance code is unsatisfactory or needs improvement in any one of the competencies, a grade of unsatisfactory is given. If a pattern of unsatisfactory performance occurs after performing the competency satisfactorily, this also constitutes a grade of unsatisfactory. An unsatisfactory or needs improvement as a final score in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.

METHODS OF EVALUATION:

- Clinical Assignments
- Completion of Patient Care
- Meditech Documentation
- Observation of Clinical Performance
- Evaluation of Clinical Performance Tool
- Onsite Clinical Debriefing
- Clinical Discussion Rubric
- Preceptor Feedback
- Nursing Care Plan Rubric
- Skills Lab Checklists/Competency Tool
- Lasater Clinical Judgment Rubric
- Virtual Simulation scenarios
- Pathophysiology Grading Rubric

PERFORMANCE CODE

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe; accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback needed related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe, accurate each time, skillful in parts of behavior, focuses more on the skill and self rather than the patient, inefficient, uncoordinated, anxious, worried, and flustered at times, expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues, faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded "U." A "U" in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the "U," the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

Grey shaded weekly competency boxes do not need a student evaluation rating or faculty/teaching assistant initials.

Objective

1. Engage in the coordination and delivery of nursing care measures to groups of patients and to patients with complex problems. (1,3,4,5,7,8)*

Comments:

Week 2 (1c)- Satisfactory discussion via CDG posting related to your Patient Advocate/Discharge Planner clinical experience. Comments per RN Preceptor: Excellent in all areas. (1f)- Great job performing IV starts during the digestive health clinical. Proper technique and aseptic procedures were followed. Keep up the great work! FB
 Week 6 (1a,b,c)- Great job managing a group of patients, assessing patients to determine needs and priority of care, and evaluating the patient's response to care delivered. FB
 Week 7 (1c)- Great job evaluating the plan of care and patient needs to determine the order of care as you cared for several patients during this clinical rotation. FB

*End-of- Program Student Learning Outcomes

Week 9-1(a-e, g) Excellent job this week managing complex patient care situations. Your care was very well organized, and you did a great job with your time management. Your head to toe assessments were very thorough and well done. You were able to determine rates and measurements on several EKG strips, and practice interpreting cardiac rhythms. Your medication passes were very well done, and you had the opportunity to administer PO, IVP and SQ medications all while following the six rights. You monitored your patient very closely to ensure positive patient outcomes. Great job! BL

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Objective

2. Formulate nursing care plans, correlations, or clinical reports that demonstrate patient-centered care of diverse populations, evidence-based practice, and clinical judgment. (1,2,3,4,5,8)*

Comments:

Resuscitation: Satisfactory participation in the practice of Hands-Only CPR, discussion regarding use of and ventilation with bag- valve mask/Ambu bag, and review of crash cart and Code Blue team duties and documentation. AR

Meditech: Satisfactory participation of assessment documentation including physical re-assessment, safety and fall assessment, RN mechanical ventilator assessment, IV location assessment, and documentation editing. Great job! FB

Physician Orders: Satisfactory completion of physician's order lab utilizing SBAR communication and taking orders over the phone. Good job! CB/BS

Prioritization/Delegation: Satisfactory completion of the prioritization and delegation skills lab. You satisfactorily prioritized care for multiple patients using multiple methods (e.g. Maslow's hierarchy of needs, ABC, Nursing Process, etc.). You were able to appropriately delegate nursing tasks for the patients, and you actively participated in the group discussion on delegation of nursing tasks. Great job! BL

Blood administration/IV pump: Satisfactory completion of practice with blood administration safety checks activity. Great job with IV pump practice, the use of the medication library, and pump set up of primary and secondary IV medication infusion. AR

IV Starts: Satisfactory participation in the IV Start lab, including practice with technique, initiation and discontinuation of IV site, and placement of IV dressing. FB/BS/CB/BL

Head to Toe Assessment: You are satisfactory for the head-to-toe assessment competency. Nice Job! BL/BS

ECG/Telemetry/Chest Tube: Satisfactory participation with review of monitoring tutorial and placement of ECG/Telemetry patches and leads; satisfactory participation in review of Chest Tube/Atrium tutorial. BL/BS

Ports/Blood Draw: You were satisfactory in accessing an Infusaport device, demonstrated proper technique for CVAD cap change and satisfactorily demonstrated how to draw blood from a CVAD per hospital policy. Nice work! CB

Central Line Dressing/IV push: Satisfactory central line dressing change using proper technique, as well as line flushing. Great job with preparation of mixing a medication with normal saline and administering

Interprets the initial heart rhythm as Sinus Bradycardia. Prioritizes administering Atropine 1 mg IVP for decreased heart rate. Correctly interprets patient's heart rhythm change as a 2nd degree Mobitz II heart block. Interprets patient's third rhythm change as a 3rd degree heart block.</p> <p>Interprets patient's heart rhythm as A-fib. Prioritizes calling the physician based on assessment findings and patient's symptoms. Prioritizes administering diltiazem promptly after order is received.</p> <p>Interprets patient's heart rhythm as v-tach without a pulse.</p>
<p>RESPONDING:</p> <ul style="list-style-type: none"> • Calm, Confident Manner: E A D B • Clear Communication: E A D B • Well-Planned Intervention/ Flexibility: E A D B • Being Skillful: E A D B <p style="text-align: center;">B</p>						<p>Introduces self, places patient on the monitor, obtains vital signs (HR-50, BP-95/58, SpO2-93%, RR-22). Reminder to identify patient. Performs a focused assessment based on patient's signs and symptoms. Calls the physician, utilizes SBAR (remember to give a recommendation), and repeats orders back. Correctly recommends administering Atropine 1 mg IVP for decreased HR after prompted by physician. Administers oxygen. Administers Atropine 1 mg IVP (reminder to use saline flush before and after medication administration). Reassesses patient. Calls MET for continued low heart rate (29). Calls physician for heart rate of 29 and heart rhythm showing 2nd degree Mobitz II heart block. Administers second dose of Atropine 1 mg IVP. Reassesses patient. Calls physician for rhythm change to 3rd degree heart block, recommends epinephrine or dopamine. Recommends transcutaneous pacing after prompt from physician.</p> <p>Introduces self and identifies patient. Places patient on the monitor, performs a focused cardiovascular assessment. Obtains patient's vital signs (HR-164, BP-106/69, SpO2 91%, RR-22). Calls physician, utilizes SBAR (remember to give a recommendation). Physician prompts to place the patient on oxygen. Gives recommendation for digoxin or diltiazem after prompt from physician. Correctly identifies dose and rate of diltiazem. Reads back orders from physician. Administers oxygen.</p>

*End-of- Program Student Learning Outcomes

	<p>Administers diltiazem bolus and gtt. Reassesses patient symptoms and heart rhythm (reminder to reassess vital signs). Calls physician for patient's continued symptoms and decreased BP. Recommends giving Atropine or Epinephrine. Stops diltiazem gtt after order received from physician. Recommends performing a cardioversion on the patient after prompt from physician.</p> <p>Calls Code Blue. Begins CPR. Brings crash cart in room. Begins bagging. Calls physician, utilizes SBAR. Recommends Epinephrine 1 mg IVP Q3-5 minutes. Places pads on patient. Administers Epinephrine 1 mg IVP. Defibrillates patient (Reminder to defibrillate as soon as possible with pulseless v-tach or v-fib). Discusses Amiodarone as an alternative to Epinephrine (300/150/drip).</p>
<p>REFLECTING:</p> <ul style="list-style-type: none"> • Evaluation/Self-Analysis: E A D B • Commitment to Improvement: E A D B 	<p>Discussed first scenario, identification and treatments for symptomatic bradycardias. Reviewed chart to look for causes of heart block (metoprolol, patient history). Talked about holding medication to see if sinus rhythm will be restored. Alternate drugs for complete heart block discussed (epi, dopamine). Discussed pacing options for symptomatic bradycardias (transcutaneous, transvenous, permanent). Talked about the importance of adjusting electrical current to obtain capture, need for medication). Excellent teamwork!</p> <p>Discussed recognition of A-fib and associated symptoms. Talked about goals of diltiazem therapy. Explanation and demonstration of synchronized cardioversion; discussed differences between cardioversion and defibrillation, the need for sedating medications prior to delivering shock. Great teamwork and communication.</p> <p>Discussed the importance of immediate CPR and defibrillation with pulseless v-tach. Discussed alternative to epi (amiodarone). Roles of the code team discussed (recorder, CPR, airway, meds, lead). Potential causes of code blue discussed (review of chart reveals low K+). Defibrillation discussed, starting low and increasing joules with subsequent shocks. Excellent job!</p>

<p>SUMMARY COMMENTS:</p> <p>E = exemplary, A = accomplished, D = developing, B = Beginning Based off of Lasater's Clinical Judgment Rubric</p> <p>Developing to accomplished is required for satisfactory completion of this simulation.</p>	<p>You are satisfactory for this simulation, great job!</p>

**EVALUATION OF CLINICAL PERFORMANCE TOOL
Advanced Medical Surgical Nursing- 2022**

**Firelands Regional Medical Center School of Nursing
Sandusky, Ohio**

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
