

Firelands Regional Medical Center School of Nursing  
Medication Profile Grading Rubric- Psychiatric Nursing 2022

| Criteria                                                                                                                                                                                                    | Ratings                                                                                                                                                        |                                                                                                            |                                                                                |                                                          | Points Earned                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|----------------------------------------------------------|---------------------------------------------------------------|
| Criterion #1<br>Identify Medication, Pharmacologic Class, and Therapeutic Class                                                                                                                             | 5 Points<br>Correctly identifies medication, pharmacologic class, and therapeutic class.                                                                       | 3 Points<br>Correctly identifies medication and either pharmacologic or therapeutic class.                 |                                                                                | 0 Points<br>Incorrectly identifies medication and class. | 5                                                             |
| Criterion #2<br>Identify Expected Pharmacological Action                                                                                                                                                    | 5 Points<br>Identifies at least 3 or more correct expected pharmacological actions. (If your source lists fewer than 3, provide your source for verification.) | 3 Points<br>Identifies 2 correct expected pharmacological actions.                                         | 1 Point<br>Identifies 1 correct expected pharmacological actions.              | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #3<br>Identify Therapeutic Effects                                                                                                                                                                | 5 Points<br>Identifies at least 3 or more correct therapeutic effects. (If your source lists fewer than 3, provide your source for verification.)              | 3 Points<br>Identifies 2 correct expected therapeutic effects.                                             | 1 Point<br>Identifies 1 correct expected therapeutic effect.                   | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #4<br>Identify Adverse Reactions/Side Effects                                                                                                                                                     | 5 Points<br>Identifies at least 5 or more correct adverse reactions/side effects.                                                                              | 3 Points<br>Identifies 2-4 correct adverse reactions/side effects.                                         | 1 Point<br>Identifies 1 correct expected correct adverse reaction/side effect. | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #5<br>Identify Potential Medication Interactions                                                                                                                                                  | 5 Points<br>Identifies at least 3 correct potential medication interactions.                                                                                   | 3 Points<br>Identifies at least 2 correct potential medication interactions.                               | 1 Point<br>Identifies at least 1 correct potential medication interactions.    | 0 Points                                                 | 5                                                             |
| Criterion #6<br>Identify Contraindications and Precautions                                                                                                                                                  | 5 Points<br>Identifies at least 3 or more correct contraindications and/or precautions                                                                         | 3 Points<br>Identifies 2 correct contraindications and/or precautions                                      | 1 Point<br>Identifies 1 correct contraindications and/or precautions.          | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #7<br>Identify Nursing Interventions                                                                                                                                                              | 5 Points<br>Identifies at least 5 or more correct nursing interventions.                                                                                       | 3 Points<br>Identifies 3-4 correct nursing interventions.                                                  | 1 Point<br>Identifies 1-2 correct nursing intervention.                        | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #8<br>Identify Routes of Administration and Adult Dosages                                                                                                                                         | 5 Points<br>Identifies at least 2 or more correct routes of medication administration and adult dosages. (or 1 if only 1 type of administration is available)  | 3 Points<br>Identifies only 1 correct route of medication administration/adult dose others are applicable. |                                                                                | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Criterion #9<br>Determine Client Education                                                                                                                                                                  | 5 Points<br>Identifies at least 3 or more relevant educational points for the client.                                                                          | 3 Points<br>Identifies 2 relevant educational points for the client.                                       | 1 Point<br>Identifies 1 relevant educational point for the client.             | 0 Points<br>Does not relate any correct responses.       | 5                                                             |
| Total Possible Points= 45 points<br>38-45 points= Satisfactory completion<br>34-38 points= Needs Improvement<br>< 34 points= Unsatisfactory<br><b>Faculty Comments: Satisfactory completion. Great job!</b> |                                                                                                                                                                |                                                                                                            |                                                                                |                                                          | <b>Total Points: 45/45</b><br><br><b>Faculty Initials: BL</b> |
