Total Possible Points= 45 points 38-45 points= Satisfactory completion 34-38 points= Needs Improvement < 34 points= Unsatisfactory Faculty Comments: Satisfactory completion. The pharmacologic class and therapeutic class were switched. The pharmacologic class of the drug is an anti-epileptic drug, and the therapeutic class is an anticonvulsant. Another reminder to please make sure that you are only using ATI, Skyscape or your textbooks to complete these medication profiles. You want to make sure that the information you are using is credible and consistent with what you will be tested on. The source you have listed is almost 10 years					Total Points: 43/45
