Criteria	3	2	1	0	Points Earned	Comments	
Noticing	1. Identify all abnormal assessment findings. (subjective and objective)	(lists at least 7*) *provides explanation if < 7	(lists 5-6)		(lists < 5 or gives no explanation)	3	Excellent job identifying abnormal assessment findings, abnormal labs/diagnostic tests, and risk factors. You would want to include the patient's blood pressure of 100/60 mmHg with your abnormal assessment findings as well. Great job highlighting all related/relevant data to help develop a priority nursing problem.
	2. Identify all abnormal lab findings/diagnostic tests.	(lists at least 3*) *provides explanation if < 3			(lists < 3 or gives no explanation)	3	
	3. Identify all risk factors.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)	3	
	4. Highlight all of the related/relevant data from the Noticing boxes to develop a priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
Interpreting	5. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	2	Great job listing appropriate nursing priorities for the patient. When considering your top priority problem, you would not prioritize imbalanced nutrition over impaired skin or tissue integrity. It is a higher priority that the nurse address the patient's wounds and skin problems before focusing on nutrition status. Potential complications should be associated with your top priority problem. Since you chose imbalanced nutrition: less than body requirements, it is not realistic to list sepsis as a potential complication.
	6. Identify all potential complications for the top nursing priority problem.	(lists at least 3)	(lists 2)		(lists < 2)	2	
	7. Identify signs and symptoms to monitor for each complication.	(lists at least 3)	(lists at least 2)		(lists < 2)	3	
Responding	8. List all nursing interventions relevant to the top nursing priority.	> 75% complete	50-75% complete	< 50% complete	0% complete	1	Unfortunately, not all of your nursing interventions are realistic or relevant to the top nursing priority that you chose. You also did not include all nursing interventions that would be pertinent for the priority problem. To be specific, you would have wanted to include interventions such as assessing the
