\*Course Objectives

**Comments:**

**Week 6 (Wound Care):** You have satisfactorily demonstrated competency in the skill of wound assessment and care (Dry Sterile Dressing & Sterile Wet to Dry Dressing), and completed Meditech documentation related to wound care. Nice job! You also did a great job participating in the restraint station as well. BL

**Week 9 (NG Insertion/Care):** Great job this week in lab demonstrating competence for Nasogastric Tube Insertion, Irrigation, and Removal through guided observation. You were able to verbalize understanding of the difference between irrigation and flushing, aspiration precautions, and familiarized yourself with the wall suction set up. Additionally, you participated in the PO intake station for accurate calculation of carbohydrate intake, accurately measured gastric output through the NG tube, and completed the assigned documentation in Meditech accurately. Keep up the hard work! BL

**Week 10 (Foley Insertion/Care):** You did a great job in the lab this week and were satisfactory with the following skills: Application of Sterile Gloves and Foley Catheter Removal. No prompts were needed. While performing the Foley Catheter insertion (female), you broke sterility after you cleaned the patient's labial folds and meatus with the betadine swabs. You did not maintain separation of the labia with one hand until the catheter was inserted. You removed your hand right before insertion and then quickly replaced it. This resulted in an unsatisfactory evaluation. One prompt was also needed to remind you to cleanse the peri-

urethral area with the cleansing cloth provided in the catheter kit. You correctly verbalized the differences in catheter insertion for a male patient. Great job independently completing the Meditech documentation for Urinary Catheter Management. BL

**11/01/2022-Remediation of Foley Catheter Insertion (Female)**

Elizabeth, you were satisfactory with the Foley Catheter insertion process for a female. You maintained the sterile field throughout the Foley insertion, did not contaminate the catheter or your gloves at any point, had very good communication, and were thorough throughout the observation. Great job! BL

**Week 11 (Head to Toe Assessment):** Elizabeth, great job in lab this week! You have satisfactorily demonstrated a basic head to toe assessment in the skills lab. No prompts were needed. Your approach was systematic, thorough, and overall well done. You demonstrated friendly, professional, and informative communication. You did a great job with the prioritization and delegation activity, as well as completing documentation in Meditech for vital signs, pain, safety and falls, and the physical reassessment. Keep up your excellent work! BL

**Week 12 (Documentation):** You have satisfactorily completed the documentation lab by actively participating in Meditech documentation related to vital signs, physical re-assessment, safety and falls, pain assessment, patient rounds, TED hose/SCD/Ace wrap, feeding method, Intake and Output, urinary catheter management, and writing a nurse note. You utilized your time wisely, asked appropriate questions, and gained experience with each intervention listed. Great job! BL
