Quality Patient Care-Z chapter 22

1. What are the seven categories that emerged from the content analysis? Seven categories that emerged from the content analysis are symptom management, activities of daily living, encouragement, emotional support, nurturing relationship, respect for religious beliefs and concern for cultural differences.
2. For each category provide an explanation of what was confirmed, reported, perceived, expected, or believed by nurse's or patient participants.
 - For symptom management category, it is confirmed that the nurses assess the patient and treat what is going on symptom wise with the patient. The patients reported gratitude for the nurses because their symptoms were resolved.
 - For the activities of daily living category, nurses confirmed that Quality Nursing Care allows for the patients to perform activities of daily living independently. Patients affirmed that nurses helped in providing the care when needed, if the patient couldn't do it themselves
 - For the encouragement category the nurses perceived that providing the patient with encouragement to perform activities of daily living, get better or enhance self care. The patients expected this. However, it was still appreciated by the patients.
 - For the emotional support category, the nurses expressed that a patient's bad mood could be improved by showing patience, empathy or time.
 - For the next category of nurturing relationship, it was confirmed that nurses help the patient connect with family, friends, and healthcare providers which help delivering quality nursing care.
 - Respect for religious beliefs participants perceives that nurses provide a way to provide families with a way to perform religious activities on the unit and respects cultural beliefs.
 - Concern for cultural differences, participants believed that nurses should consider patients cultural needs and restrictions.
3. How can you use the information obtained from this article as you become a registered nurse? How will this affect the quality of care you provide? (explain) This study showed that patients need all aspects of care this includes psychosocial, spiritual and physical needs. I will be considerate of all these things in order to provide the best quality care that I can provide as an RN.
