Quality Patient Care-Z chapter 22

1. What are the seven categories that emerged from the content analysis?

Symptom management, activities of daily living, encouragement, emotional support, nurturing relationship, respect for religious beliefs and concerns of cultural differences,

2. For each category provide an explanation of what was confirmed, reported, perceived, expected, or believed by nurse's or patient participants.

Patients' perceptivity degree of excellence care that meets their spiritual mental social physical and environmental needs, As nurses perception needs to meet the physical, emotional, social, and cultural and spiritual needs of customers. Patients perspectivity the nurse should be confirming, be respected, communicative and supportive and feeling belonged and valued.

3. How can you use the information obtained from this article as you become a registered nurse? How will this affect the quality of care you provide? (explain)

So easy to feel overloaded at work and not enough time to provide the psychological, emotional, social and spiritual care that you wanted to. Try to give your best and meet the needs of the patient as much as you can to make their lives a little better and be satisfied with the healthcare that they got. For the most part patients like to communicate and talk. May have a few that would rather be left alone, and this is ok too. May need to ask them a few questions to get them to open up
