Quality Patient Care-Z chapter 22

1. What are the seven categories that emerged from the content analysis? Symptom management, activities of daily living, Encouragement, Emotional support, Nursing relationships, Respect for religious beliefs, Concerning cultural differences.

2. For each category provide an explanation of what was confirmed, reported, perceived, expected, or believed by nurse's or patient participants.
 1. The nurse assess the patient involve, provide care to relieve or reduce physical signs and symptoms (thus completes a head to toe assessment). The patient reports their gratitude because many of their problems disappeared after receiving treatment by the nurse (pain, nausea ,edema, SOB).
 2. Provides the patient opportunity to finish daily living activities as if they are healthy. Patient affirmed that essential primary nursing care was accomplished along with treatments from the nurses.
 3. Giving encouragement including inspiring the patient to get well or administer self care thus enhancing their self confidence to assist in optimizing their health and managing their illness. The patient expected sincerity and engage them in a discussion to inspire them.
 4. Shows that relieving a patient bad mood can be assisted by showing empathy and giving indulgent care.
 5. The nurse helps with connecting with family and friends and health care providers which is vital for delivering and receiving QNC.
 6. The nurse provides the patient and patient family the opportunity to perform religious Activities in the unit and that respecting their traditional and cultural beliefs is vital for providing QNC.
 7. The nurse develops a plan of care that should consider the patients different health related attributes , cultural needs and the need to discuss any restrictions they may have related to their culture or religion and traditional beliefs, dietary, hygiene, or gender preferences.

3. How can you use the information obtained from this article as you become a registered nurse? How will this affect the quality of care you provide? (explain) To provide QNC I would have to provide care with an open mind and a good heart. QNC is more than just treating physical symptoms it is also respecting the patient and knowing not all patients are the same. I am not here to judge and should provide QNC to all individuals no matter what. It will ensure that my patients get the best QNC and have an positive attitude towards getting better and health care staff.
