

**EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2023**

**Firelands Regional Medical Center School of Nursing
Sandusky, Ohio**

Student:

Final Grade: Satisfactory/Unsatisfactory

Semester: Spring

Date of Completion:

Faculty: Dawn Wikel, MSN, RN, CNE; Lora Malfara, MSN, RN; Kelly Ammanniti, MSN, RN, CHSE;
Monica Dunbar, MSN, RN; Nick Simonovich, MSN, RN

Faculty eSignature:

Teaching Assistant: Rachel Haynes, BSN, RN

DIRECTIONS FOR USE:

Each week the students evaluate themselves based on the competencies using the performance code on page 2. The performance code includes the terms **Satisfactory (S)**, **Needs Improvement (NI)**, **Unsatisfactory (U)**, and **Not Available (NA)**. The faculty member will initial if in agreement with the student’s evaluation. If there is a discrepancy in the performance code evaluation between the student and the faculty member, a note is written on the comment section by the faculty member with the rationale for the evaluation. All competencies must be rated a “S, NI, U, or NA”. If the student does not self-rate, then it is an automatic “U”. A student who submits the clinical evaluation tool late will be rated as “U” in the appropriate competency(s) for that clinical week. Whenever a student receives a “U” in a competency, it must be addressed with a comment as to why it is no longer a “U”. If the student does not state why the “U” is corrected, it will be another “U” until the student addresses it. All clinical competencies are critical to meeting the objectives of the course. If the final performance code is unsatisfactory or needs improvement in any one of the competencies, a grade of unsatisfactory is given. If a pattern of unsatisfactory performance occurs after performing the competency satisfactorily, this also constitutes a grade of unsatisfactory. An unsatisfactory or needs improvement as a final score in any single competency results in a clinical course grade of unsatisfactory; this is a failure of the course. The terms Satisfactory and Unsatisfactory will be used in evaluating the final grade or clinical course performance.

METHODS OF EVALUATION:

- Skills Lab Competency Tool & Skills Checklists
- Simulation, Prebriefing, PEARLS Debriefing, & Reflection Journals
- Nursing Care Map Rubric
- Meditech Documentation
- Clinical Debriefing
- Clinical Discussion Group Grading Rubric
- Evaluation of Clinical Performance Tool
- Lasater’s Clinical Judgment Rubric & Scoring Sheet
- Virtual Simulation Scenarios

ABSENCE (Refer to Attendance Policy)

Date	Number of Hours	Comments	Make-up (/Date/Time)

Faculty’s Name	Initials
Kelly Ammanniti	KA
Monica Dunbar	MD
Rachel Haynes	RH
Lora Malfara	LM
Nick Simonovich	NS
Dawn Wikel	DW

PERFORMANCE CODE

SATISFACTORY CLINICAL PERFORMANCE

Satisfactory (S): Safe, accurate each time, efficient, coordinated; confident, focuses on the patient; some expenditure of excess energy; within a reasonable time period; appropriate affective behavior; occasional supporting cues; minimal faculty feedback related to written clinical work.

UNSATISFACTORY CLINICAL PERFORMANCE

Needs Improvement (NI): Safe; accurate each time; skillful in parts of behavior; focuses more on the skill and self rather than the patient; inefficient, uncoordinated, anxious, worried, flustered at times; expends excess energy within a delayed time period, frequent verbal and occasional physical directive cues in addition to supportive cues; faculty feedback required in several areas of clinical written work.

Unsatisfactory (U): Failure to achieve the course competency, safe but needs faculty reminders constantly, not always accurate, unskilled, inefficient, considerable expenditure of excess energy, anxious, disruptive or omitting behaviors, focus on skills and/or self, continuous verbal and frequent physical cues, unsafe, performs at risk to patient/clients/others, unable to function, incomplete, erroneous, faulty, illegible clinical written work, no feedback sought from faculty or response to feedback not evident in submitted written work. If the student does not self-rate a competency the competency is graded “U.” A “U” in a competency must be addressed in writing by the student in the Evaluation of Clinical Performance tool. The student response must include how the competency has been or will be met at a satisfactory level. If the student does not address the “U,” the faculty member (s) will continue to rate the competency unsatisfactory.

OTHER

Not Available (NA): The clinical experience which would meet the competency was not available.

***Grey shaded boxes do not need a student evaluation rating or faculty/teaching assistant initials.**

Date	Care Map Top Nursing Priority	Evaluation & Instructor Initials	Remediation & Instructor Initials	Remediation & Instructor Initials
1/28/2023	Acute pain	RH		

Note: Students are required to submit two satisfactory care maps over the course of the semester. If the care map is not evaluated as satisfactory upon initial submission, the student may revise the care map based on instructor feedback/remediation and resubmit until satisfactory. At least one care map must be submitted prior to midterm.

Objective

1. Illustrate correlations to demonstrate the pathophysiological alterations in adult patients with medical-surgical problems. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			S	S	NA	S											
a. Analyze the involved pathophysiology of the patient's disease process. (Interpreting)			S	S	NA	S											
b. Correlate patient's symptoms with the patient's disease process. (Interpreting)			S	S	NA	S											
c. Correlate diagnostic tests with the patient's disease process. (Interpreting)			S	S	NA	S											
d. Correlate pharmacotherapy in relation to the patient's disease process. (Interpreting)			S	S	NA	S											
e. Correlate medical treatment in relation to the patient's disease process. (Interpreting)			S	S	NA	S											
f. Correlate the nutritional needs in relation to patient's disease process. (Interpreting)			S	S	NA	S											
g. Assess developmental stages of assigned patients. (Interpreting)			S	S	NA	S											
h. Demonstrate evidence of research in being prepared for clinical. (Noticing)	NA S		S	S	NA	S											
	Indicate your clinical site as well as your patient's age and primary medical diagnosis in this box weekly.	Meditech, FSBS, IV Pump Sessions	3T 65, Pneumonia	5T, 73, R Total Knee	NA	4N, 77, Lumbar Disectomy											
	Instructors Initials	RH	RH	MD													

Comments: Week 1 (1h)- During week 1, the Meditech, FSBS, and IV pump sessions were all considered clinical hours. You came prepared to each of them and demonstrated competency accordingly. For this reason, you have earned an S for this competency. RH

Week 4 Objective 1B, C, and D-Great job this week correlating the patient’s symptoms, diagnostic tests, and pharmacotherapy to what was going on with your patient. MD

Objective																	
2. Perform physical assessments as a method for determining deviations from normal. (3,4,5)*																	
Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:			S	S	NA	S											
a. Perform inspection, palpation, percussion, and auscultation in the physical assessment of assigned patient. (Noticing)			S	S	NA	S											
b. Conduct a fall assessment and implement appropriate precautions. (Noticing)			S	S	NA	S											
c. Conduct a skin risk assessment and implement appropriate precautions and care. (Noticing)			S	S	NA	S											
d. Communicate physical assessment. (Responding)			S	S	NA	S											
e. Analyze appropriate assessment skills for the patient’s disease process. (Interpreting)			S	S	NA	S											
f. Demonstrate skill in accessing electronic information and documenting patient care. (Responding)	S		S	S	NA	S											
	RH		RH	MD													

Comments:

Week 1 (2f)- By attending the Meditech clinical update & providing your full, undivided attention during the demonstration of documenting insulin, IV solutions, saline flushes and IV site assessments you are satisfactory for this competency. NS

Week 4 Objective 2-You did an awesome job with performing your assessments on your patient and analyzing the appropriate assessment skills for your patient. MD

Objective																	
3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*																	
Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:	S		S	S	NA	S											
a. Perform standard precautions. (Responding)	S		S	S	NA	S											
b. Demonstrate nursing measures skillfully and safely. (Responding)	S		S	S	NA	S											
c. Demonstrate promptness and ability to organize nursing care effectively. (Responding)			S	S	NA	S											
d. Appropriately prioritizes nursing care. (Responding)			S	S	NA	S											
e. Recognize the need for assistance. (Reflecting)			S	S	NA	S											
f. Apply the principles of asepsis where indicated. (Responding)	S		S	S	NA	S											
g. Demonstrate appropriate skill with Foley catheter insertion, maintenance, & removal (Responding)			NA	NA	NA	S											
h. Implement DVT prophylaxis (early ambulation, SCDs, and TED hose) based on assessment and physicians' orders (Responding)			NA	S	NA	S											

i. Identify the role of evidence in determining best nursing practice. (Interpreting)	S		S	S	NA	S												
j. Identify recommendations for change through team collaboration. (Reflecting)			S	S	NA	S												
	RH		RH	MD														

Comments:

Week 4 Objective 3-You did a great job with this set of competencies. You were able to implement DVT prophylaxis and identify recommendations with team collaboration. MD

Objective

3. Execute safety precautions in the implementation of quality, patient-centered care and evidence-based nursing interventions. (2,3,4,5,8)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
Competencies:																	
k. Administer PO, SQ, IM, or ID medications observing the rights of medication administration. (Responding)			S	S	NA	S											
l. Ensure patient safety through proper use of EHR, IV flow sheet, and BMV. (Responding)			S	S	NA	S											
m. Calculate medication doses accurately. (Responding)			S	S	NA	S											
n. Administer IV therapy, piggybacks, IV push, and/or adding solution to a continuous infusion line. (Responding)			S	NA	NA	NA											
o. Regulate IV flow rate. (Responding)	S		S	NA	NA	NA											
p. Flush saline lock. (Responding)			S	NA	NA	NA											
q. D/C an IV. (Responding)	NA		NA	NA	NA	NA											

r. Monitor an IV. (Noticing)	S		S	NA	NA	NA											
s. Perform FSBS with appropriate interventions. (Responding)	S		NA	NA	NA	NA											
	RH		RH	MD													

Comments:

Week 1 (3o, r)- By attending the IV Pump clinical and providing your full, undivided attention and active participation during the demonstration of the Alaris pump, documentation of IV site maintenance and recognition of potential IV complications, you are satisfactory for this competency. LM

(3s)- You were able to demonstrate understanding of the rationale of FSBS and the use of the glucometer. You were able to perform a Quality Control check of the glucometer as well as demonstrate skills and knowledge required of proper sample ID, collection, and handling of blood. DW

Week 4 Objectives 3K, L, and M-Awesome job with medication administration this week! You were very good at identifying the medications and thorough with the process of administration. MD

Objective																	
4. Use therapeutic communication techniques to establish a baseline for nursing decisions. (1,5,7)*																	
Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final

Competencies:			S	S	NA	S											
a. Integrate professionally appropriate and therapeutic communication skills in interactions with patients, families, and significant others. (Responding)			S	S	NA	S											
b. Communicate professionally and collaboratively with members of the healthcare team using hand-off communication techniques. (SBAR) (Responding)			S	S	NA	S											
c. Report promptly and accurately any change in the status of the patient. (Responding)			S	S	NA	S											
d. Maintain confidentiality of patient health and medical information. (Responding)			S	S	NA	S											
e. Consistently and appropriately post comments in clinical discussion groups. (Reflecting)			S	S	NA	S											
f. Obtain report, from previous care giver, at the beginning of the clinical day. (Noticing)			S	S	NA	S											
g. Provide a clear, organized hand-off report to your patient's next provider of care. (Responding)			S	S	NA	S											
			RH	MD													

Comments:

Week 4 Objective 4B-Wonderful job identifying a problem in your team leading discussion post and using SBAR to communicate the issue. You did a great job! MD

Objective																		
5. Implement patient education based on teaching needs of patients and/or significant others. (1,6)*																		
Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final	

Competencies:			S	S	NA	S											
a. Describe a teaching need of your patient.** (Reflecting)			S	S	NA	S											
b. Utilize appropriate terminology and resources (Lexicomp, UpToDate, Dynamic Health, Skyscape) when providing patient education. (Responding)			S	S	NA	S											
			RH	MD													

****5a & b- You must address this competency in the comments below for all clinicals on 3T, 4N, or Rehab- describe the patient education you provided; be specific- include the topic, method of delivery, reason for teaching need, materials to support learning through above resources (if applicable), and method used to validate learning.**

Example: Education related to orthostatic hypotension (changing positions slowly by sitting at the side of the bed or chair for a few minutes before moving to another position, utilizing the walker when ambulating) was provided to my patient through discussion and demonstration. This was necessary to maintain patient safety as he/she was experiencing a drop-in blood pressure and dizziness when getting out of bed. A patient education sheet was printed from Lexicomp and given to the patient. The teach back method was used to validate learning.

Comments:

Week 3 Teaching: One teaching intervention that I provided for my patient was splinting while coughing. My patient was experiencing a lot of discomfort with her persistent cough. I instructed her to hold a pillow tight to her chest while coughing to help with the pain. I demonstrated how to effectively do it and she then tried. She stated that it greatly helped with her pain. **Good educating! This also may help her decrease the amount of pain medication she was requiring previously. RH**

Week 3 Terminology: When providing the instruction to the patient I was sure to what splinting meant using proper medical terminology. Next clinical, I will be sure to print off a sheet from Lexicomp to better supplement the teaching that I provide to any of my patients in the future. The patient was able to demonstrate splinting and utilized it for the coughing spells that I witnessed while in the room. **Lexicomp is a great resource for nurses and patients, but it can also contain medical terminology. Be sure to use that as a reference while educating the patient and ask if the patient has any questions. Good idea! RH**

Week 4 Teaching: One teaching need that I found necessary for my patient was reiterating the need to cough and deep breath because of the limited physical activity that she was having while being in the hospital. The patient disclosed that she sometime felt that she needs to “cough up something.” **Great! MD**

Week4 Resource: During my teaching I made sure verbalize and demonstrate how to diaphragmatically breath and cough. I gave a frequency of once every 15-30 minutes while inactive. The patient demonstrated back her understanding after her teaching session and also at the end of the clinical day to make sure she retained the information. **Wonderful! MD**

Week 6 Teaching: My patient required teaching on smoking cessation. She is a heavy smoker at home and required a nicotine patch while in the hospital.

Week 6 Resource: During 2 of my patient encounters, I educated the patient on possible complication and health risks about smoking using information found on the intranet. I asked the patient if she was interested in quitting smoking and she declined as well as further education on quitting smoking. I also asked the patient if she was interested in further using nicotine patches out of the hospital and she declined.

Objective

6. Implement patient-centered plans of care utilizing the nursing process, clinical judgment, and consideration for cultural, ethnic, and social diversity. (2,3,4,5)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Develop and implement a priority care map utilizing the nursing process and clinical judgment. (Noticing, Interpreting, Responding, Reflecting)			S	NA	NA	S											
b. Identify factors associated with Social Determinants of Health (SDOH) &/or cultural elements that have the potential to influence patient care.** (Noticing, Interpreting, Responding, Reflecting)			S	S	NA	S											
			RH	MD													

****6b- You must address this competency in the comments on a weekly basis. For all clinicals - provide an example of SDOH &/or cultural elements that influenced your patient's care; be specific.**

Comments:

See Care Map Grading Rubrics below.

Week 3 SDOH: For my patient some social determinants of health is that she is retired and does not work and that could affect her ability to pay for the hospital stay or her medications when she leaves. I also noticed that during the two days that I was on clinical that no one came in and visited with her and she was never talking on that phone. I question what type of support system she has at home. She sees a PCP for her health concerns, but I don't know how regularly she goes because of her persistent cough that eventually lead to her into the hospital for this stay. The patient seemed well educated and was able to understand and retain what was happening to her in the hospital and also what the doctor would tell her too. The patient never voiced concerns about her living situation or returning home. She actually said she couldn't wait to get back home. **Good observations. One could wonder if maybe she is a caregiver for a loved one since she was ready to go home. She seemed to be very self-sufficient and was able to perform her ADLs with no assistance. Those on a fixed income with retirement and/or social security may need assistance with their healthcare bills, and we could always provide information for financial assistance and billing. RH**

Week 4 SDOH: This week my patient was retired and living at home on a farm with her husband. She explained she has a great support system and large family that is very active in her life. She told me that some of her friends were coming to visit her in the afternoon, but I did not personally see them or any other family members there. She told me that her and her husbands are “doing well” financially and has no issues with paying bills, however she is worried about rising inflation. She sees a primary care provider who helps her manage her HTN. She was a stay at home mom and entrepreneur before she retired and enjoys spending her free time with her family.

Awesome! You were able to learn so much about your patient this week! It makes a huge difference to have a great support system. MD

Week 6 SDOH: During this week’s clinical, my patient was elderly and retired and was concerned about her current illness and her finances. Specifically, she was concerned about paying for this hospital visit since she has had so many health issues recently. She was also concerned about how she was going to move about her house with the current living situation that she had and it not bei

Objective

7. Illustrate professional conduct including self-examination, responsibility for learning, and goal setting. (7)*

Weeks of the Course	1	2	3	4	5	6	7	8	Midterm	9	10	11	12	13	Make Up	Make Up	Final
a. Reflect on an area of strength. ** (Reflecting)	S		S	S	NA	S											
b. Reflect on an area for improvement and set a goal to meet this need.** (Reflecting)	S		S	S	NA	S											
c. Demonstrate evidence of growth, initiative, and self-confidence. (Responding)	S		S	S	NA	S											
d. Follow the standards outlined in the FRMCSN Student Code of Conduct Policy. (Responding)	S		S	S	NA	S											
e. Incorporate the core values of caring, diversity, excellence, integrity, and “ACE”- attitude, commitment, and enthusiasm during all clinical interactions. (Responding)	S		S	S	NA	S											
f. Exhibit professional behavior i.e. appearance, responsibility, integrity, and respect. (Responding)	S		S	S	NA	S											
g. Demonstrate the ability to give and receive constructive feedback. (Responding)	S		S	S	NA	S											
h. Actively engage in self-reflection. (Reflecting)	S		S	S	NA	S											
	RH		RH	MD													

****7a and 7b: You must address these competencies in the comments section on a weekly basis. Please write a different comment each week. Remember that a goal includes what you will do to improve, how often you will do it, and when you will do it by (example- “I had trouble remembering to do the three checks of the six medication rights prior to administering medications. I will review the six rights and medication administration content in the textbook twice before the next clinical. Additionally, I will request to meet with my clinical faculty member to practice preparing and administering at least three medications before the next clinical.”**

*End-of-Program Student Learning Outcomes

Clinical Judgment Terminology: Noticing, Interpreting, Responding, Reflecting

Comments:

Week 1 Strength: I think that in this first week my strength was being able to recall back on nearly everything that we went over in Nursing foundations during of skills lab day with Nick and Lora. I actually surprised myself at how natural all of the skills I did not have to read through the red folder before performing with interventions, only after to make sure that I did it properly. I also asked good questions during the hand off report from Lora. **RH**

Week 1 Area of Improvement: For next week, I really want to re-watch all of the IV pump videos on ATI because I feel like there was so much information to be able to absorb it all at once. Also, with the peripheral IV videos. I think that by doing that I will be a lot more comfortable when it comes to the clinical setting as it is hard to handle that type of equipment outside of the classroom. I just felt like I didn't fully grasp all of the content and would feel more at ease before going to the clinical setting. **I think this is a great goal and will assist with your clinical skills. Don't forget to add a frequency when writing your goals. RH**

Week 3 Strength: This week I was so proud of myself that I recognized and was able to recall nearly half of her prescribed medications because they were what we learned for our pharmacology quiz. I barely used SkyScape to just double check that I was correct. **So exciting to see you are noticing how much you are learning in class! RH**

Week 3 Area of Improvement: I think that for next week on clinical I want to learn more about my patients outside of their medical condition. I realized when asked about her social determinants on Health that I really had to sit and think about it. I want to learn about the patient's job, family, life, if they have pets, what they like to do in their free time. I will find 3 therapeutic communication videos related to healthcare online and watch them each once to help learn different ways to connect with my patients before clinical next week. **I bet your patient will love sitting and talking with you next week. This is a great goal. RH**

Week 4 Strength: This week I wanted to work on week 3's area of improvement and really get to know my patient. I feel like I was really able to connect with my patient and got to know her on a more personal level. We even swapped recipes! **Amazing! It is so wonderful to be able to connect with patients on that level! MD**

Week 4 Area of Improvement: Next time team leading I really want to take a more forward approach and be more confident in my judgment. I feel that I was nervous to Team Lead because I was the first one out of the group and had no idea what to expect. I want to be more forthcoming to my team members that I am there as a resource and asset to them during clinical. Before the next team leading experience, I want to read through the Team Steps book and pick a method to use prior to clinical to help get the most out of the experience. **This is a great goal! I know you said you were nervous during the clinical, but you did great! There is always room for improvement but for this being your first experience I am proud of you! MD**

Week 6 Strength: This week I did well inserting my first Foley catheter into a male patient. I took proper supplies into the room and maintained sterility throughout the procedure. I asked the patient for prior prostate issues and identified that I may need to order a coudae Cather if a standard 16 French wouldn't work. When inserting, I met resistance at the prostate but remembered to gently twist while advancing and soon saw a flash of urine! I was proud of my ability to apply what I had worked so hard in lab for.

Week 6 Area of Improvement: Next clinical I want to prioritize patient education, specifically Lexicomp. I feel that I do well at identifying the need for education in my patients, but I fail to follow up with something physical to give my patients. To improve on this, I want to freely explore and look through some educational handouts on Lexicomp after theory to familiarize myself with what is available.

Student Name: Ashley H		Course Objective:					
Date or Clinical Week: 1/25/23-1/26/23		Course Objective:					
Criteria		3	2	1	0	Points Earned	Comments
Noticing	1. Identify all abnormal assessment findings (subjective and objective); include specific patient data.	(lists at least 7*) *provides explanation if < 7	(lists 5-6)	(lists 5-7 but no specific patient data included)	(lists < 5 or gives no explanation)	3	
	2. Identify all abnormal lab findings/diagnostic tests; include specific patient data.	(lists at least 3*) *provides explanation if < 3		(lists 3 but no specific patient data included)	(lists < 3 or gives no explanation)	3	
	3. Identify all risk factors relevant to the patient.	(lists at least 5*) *provides explanation if < 5	(lists 4)	(lists 3)	(lists < 3 or gives no explanation)	3	

Inte	4. List all nursing priorities and highlight the top priority problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	5. Highlight all of the related/relevant data from the Noticing boxes that support the top priority nursing problem.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	6. Identify all potential complications for the top nursing priority problem.	(lists at least 3)	(lists 2)		(lists < 2)	3	
	7. Identify signs and symptoms to monitor for each complication.	(lists at least 3)	(lists 2)		(lists < 2)	3	
Responding	8. List all nursing interventions relevant to the top nursing priority.	> 75% complete	50-75% complete	< 50% complete	0% complete	3	10. Make sure ALL interventions have frequency 12. Number 4 rationale is related to COPD, not acute pain. Make sure rationale is related to diagnosis you chose. Why is ambulation important for acute pain patients? Reference format for in-text citation (Author, Year)
	9. Interventions are prioritized	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	10. All interventions include a frequency	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	11. All interventions are individualized and realistic	> 75% complete	50-75% complete	< 50% complete	0% complete	3	
	12. An appropriate rationale is included for each intervention	> 75% complete	50-75% complete	< 50% complete	0% complete	3

Comments:

Week 1

(IV Math)-You satisfactorily participated in the IV Math learning session on 1/10/23 as well as the assigned IV Math practice questions and the IV Math Application lab on 1/11/23 or 1/12/23. KA/DW

(Assessment)- You were able to satisfactorily demonstrate the Basic Head to Toe Assessment during lab. KA/RH

(Insulin)- You were able to correctly prepare an insulin pen and administer subcutaneous insulin. Insulin requirements were accurately identified and calculated through the corrective scale and carbohydrate coverage orders. MD

(Lab Day)- You satisfactorily completed the mandatory lab review of nursing foundational skills. This was achieved through simulating care for a patient in a scenario requiring competency in assessment, communication, medication administration (including PO and IM injection),

nasogastric tube insertion and maintenance, patient mobility and hygiene, use of PPE for Contact Isolation, wound care, and foley insertion. NS/LM

(IV Skills)- You have satisfactorily completed the IV lab including a saline flush, IV push, hanging a primary and secondary IV solution, adjusting a flow rate to run by gravity, discontinuing IV solution, and monitoring the IV site for infiltration, phlebitis, and signs of complication. NS/MD/RH

Week 2:

(EBP Lab)- You actively participated in the online searching process for evidence-based practice literature, as well as reviewing example articles to determine appropriate selection and information needed when summarizing a research article. LM/LK

(Trach Care & Suctioning 1/19/2023) - During this lab, you satisfactorily demonstrated competence with tracheal airway suctioning and tracheostomy care. You did an excellent job of explaining the procedure to your patient. You have a strong understanding of sterility and maintaining a sterile field. Both skills were performed efficiently. Keep up the good work! DW

EVALUATION OF CLINICAL PERFORMANCE TOOL
Medical Surgical Nursing – 2023

Firelands Regional Medical Center School of Nursing
Sandusky, Ohio

I was given the opportunity to review my final clinical ratings in each course competency. I was given the opportunity to ask questions about my clinical performance. I have the following comments to make about my clinical performance/final clinical evaluation:
